## *Design*

The MINIMAL shower system: reduced dimensions for a range of complete solutions.  
For glass thicknesses 6 or 8 mm, with a maximum load of 35 kg.

Finished track and aluminium cover.  
**MAXIMUM AESTHETICS AND FUNCTIONALITY**  
Complete kits for every type of installation, including STOPS or SOFTBREAK dampers.  
Simple installation with the utmost long-term functionality.

# GOCCIA 35

## Technical properties

The system has a unique load-bearing aluminium profile, 35 mm x 40 mm, offering a wide range of personalised solutions to meet the needs of every client and supporting doors weighing up to 35 kg.

In addition, the distance between the fixed glass and moving door is just 18 mm, while the bottom rail has a quick-release mechanism to facilitate cleaning. The system includes a dual Softbreak damper system when opening and closing the door, with a stopping distance of 60 mm.

The unique feature of this system is the ease of assembly. It is also highly functional and reliable over time.

### 4 configurations

Wall/Wall

Wall/Glass

Glass/Glass

Wall/Corner/Wall

### 2 types of installation

#### Linea U

*For framed fixed panes*

Simple, modern design. With Linea U, fixed panes are held within a 15 mm x 16 mm aluminium profile. The same profile, with an upper snap-on cover, acts as a water barrier in the open area.

#### Linea S

*For sealed fixed panes*

Elegance and perfect transparency. With Linea S, fixed panes are sealed to the supporting surface. A space-saving water barrier profile in aluminium, 8 mm x 10 mm, can be installed at the opening.

**DOOR ADJUSTMENT**

The height of each carrier can be adjusted to regulate the position of the door.

**SILENT**

The roller, with its steel bearing, provides silent and long-lasting operation

**COMPACT DESIGN**

Complete functionality in a reduced space

**SOFT BREAK**

The use of dampers reduces the speed of the door, attenuating impacts and allowing for controlled, noise-free movement.

**CLEANING**

The sliding door can be detached with PUSH & UNLOCK functionality

Matt aluminium

# GOCCIA 50

## Technical properties

Aluminium load-bearing profile, 68 mm x 54 mm adapted to various needs. The sliding door can weigh up to 40 kg, and the distance between the fixed panes and moving doors is just 13 mm. In addition, the quick-release rail at the floor simplifies cleaning. The dual Softbreak damper system, with a stopping distance of 60 mm, ensures safe and reliable opening and closing over time.

### 5 configurations

### 2 types of installation

#### Linea U For framed fixed panes

Simple, modern design. With Linea U, fixed panes are held within a 15 mm x 16 mm aluminium profile. The same profile, with an upper snap-on cover, acts as a water barrier in the open area.

#### Linea S For sealed fixed panes

Elegance and perfect transparency. With Linea S, fixed panes are sealed to the supporting surface. A space-saving water barrier profile in aluminium, 8 mm x 10 mm, can be installed at the opening.

**DOOR ADJUSTMENT**

The height of each carrier can be adjusted to regulate the position of the door.

**TRACK ADJUSTMENT**

Vertical and angular adjustments allow the track to adapt perfectly to all types of needs.

**CARRIER**

The carrier has four wheels to guarantee the utmost stability when the doors are sliding.

**SOFT BREAK**

The use of dampers reduces the speed of the door, attenuating impacts and allowing for controlled, noise-free movement.

**CLEANING**

The sliding door can be detached with PUSH & UNLOCK functionality

# GLMFLAT

## *Design*

The lightness of an all-glass system is combined with straight lines and the beauty of steel.

Sliding wheels visible on a minimal 30 mm x 10 mm rail. This is the GLMFLAT system.

**/8**  
Brushed steel

**/15**  
Polished steel

# GLMFLAT

## Technical properties

Sliding door system for 8-mm glass with visible mechanisms.  
 The carriers and stabilisation accessories slide on a robust yet minimal track to move doors weighing up to 35 kg. From the end stop to the bottom rail, the system is equipped with sophisticated accessories, without limiting functionality or reliability.

### 4 configurations

### 2 types of installation

**Kits**  
*With framed fixed panes*

Simple, modern design.  
 With this solution, fixed glass panes are installed within a 15 mm x 16 mm aluminium profile. The same profile, with an upper snap-on cover, acts as a water barrier in the open area.

**Kits**  
*With sealed fixed panes*

Elegance and perfect transparency.  
 With this solution, fixed panes are sealed to the support surfaces. A space-saving water barrier profile in aluminium, 5 mm high, can be installed at the opening.

**VISIBLE MECHANISMS**  
 The sliding wheels and external anti-derailment devices highlight the functional parts

**ADJUSTMENT**  
 The height adjustment of the individual carrier allows the position and inclination of the door to be recorded

**MINIMAL DESIGN**  
 The design combines essential aesthetics and functional elegance

# DCCFLAT

## *Design*

The elegance of steel combines with the transparency of glass.  
The DCCFLAT system offers long-lasting performance and an  
even more sophisticated design.

# DCCFLAT

## Technical properties

Sliding door system for 8-mm glass with visible mechanisms. Featuring easy assembly and adjustment, this elegant and functional solution supports doors weighing up to 35 kg. Innovative technical solutions minimize the number of visible components, without ever overlooking the functional features of a top-of-the-line system.

### 4 configurations

Wall/Wall

Wall/Glass

Glass/Glass

Wall/Corner/Wall

### Types of installation

#### Kits

*For framed fixed panes*

Simple, modern design.  
With this solution, fixed glass panes are installed within a 15mm x 16mm aluminium profile. The same profile, with an upper snap-on cover, acts as a water barrier in the open area.

### MINIMAL DESIGN

The design combines essential aesthetics and functional elegance

### STABILISATION

The anti-derailment system is incorporated in the carrier, minimising the number of visible components

### VISIBLE MECHANISMS

The simple and discreet functional components featuring external sliding wheels make the glass stand out.

### ADJUSTMENT

The height regulation of the carriers using a hidden set screw allows for simple and precise adjustments.

# GIUMAX

## *Design*

Rounded shapes combine with the strength of a fully stainless steel track for enviable performance. GIUMAX SHOWER joins the style of its carriers with the resistance of AISI 304 stainless steel.

/8  
Brushed steel

/15  
Polished steel

# GIUMAX

## Technical properties

The sliding shower door system for 8-mm glass in the GIUMAX series uses visible sliding wheels on load-bearing tracks. These solutions are made of AISI 304 stainless steel and stand out for their elegance, reliability and durability.

### 3 configurations

### Types of installation

### Kits

#### For framed fixed panes

Simple, modern design.  
With Linea U, fixed panes are held within a 15 mm x 16 mm aluminium profile.  
The same profile, with an upper snap-on cover, acts as a water barrier in the open area.

### Installation with pair of sliding wheels

**SYSTEM WITH SLIDING WHEELS**

The door is mounted on two sliding wheels and the track operates within the dimensions of the door.

**SYSTEM WITH CARRIER**

The door is mounted on carrier. The track moves in the upper part of the carrier, above the door.

**MAXIMUM TRANSPARENCY**

The system stands out for its goal of obtaining the utmost transparency with the use of sleek accessories and a minimal design.

**DOOR ADJUSTMENT**

With the carrier technology, the height of the sliding wheel and hubs can be adjusted, thereby regulating the position of the door.

Installation with carrier

## *Design*

Aesthetics, technology, and functionality. This is what makes the SQUARE series one of the highest-performance product lines.

The clean design with its square lines enhances every application requiring the utmost transparency and cleanliness. The different finishes and TÜV mark make each creation unique and reliable.

Suitable for glass thicknesses from 6 to 12 mm, the SQUARE range offers standard configurations as well as numerous opportunities for customisation thanks to the hinges, locks, knobs, clamps, and stabilizer bars, which can be combined to adapt to any type of request.

# SQUARE

## DQ Hinges

DQ hinges are the functional heart of the HD SQUARE SERIES.  
The hinge body is made of cast brass, while the components are mechanically processed.

Cap on one side to cover the screws fixing the hinge on the glass.

Adhesive seals to facilitate positioning of the hinge on the glass.

**CLOSING RETURN**  
Automatic return to the zero position in the last 30°.

**CORRECTION 10°**  
Correction of the door angle  $\pm 10^\circ$  upon installation.

**ANGLE OF ROTATION**  
Angle of rotation from  $+90^\circ$  to  $-90^\circ$ .  
With rest point at  $0^\circ$  and stops at  $-90^\circ$  and  $+90^\circ$ .

**NO VISIBLE SCREWS**

**TWO VERSIONS FOR GLASS WITH THICKNESS FROM 6 TO 12 mm**

The HD SQUARE SERIES can be used for glass with thickness from 6 to 12 mm thanks to hinges and locks in two versions, small and large. Depending on the chosen glass, it is possible to select the related hinge.

Adhesive finishing  
screw-cover cap

**WALL/GLASS**  
with side plate

### TESA® ACX<sup>plus</sup> DOUBLE-SIDED TAPE

Transparent double-sided tape for structural fixing of glass, steel and aluminium. The paper liner makes manual application of the tape easier. Solid, high performance backing with excellent viscoelastic properties and high bonding power, dissipation of static and dynamic stresses, plus high resistance to temperatures, humidity, UV rays, and chemical agents. Maximum operating temperature 100°C; peak temperature 200°C (max. 20 minutes). Recommended for glass/glass and glass/metal bonding: ideal for compensating different thermal expansions without losing strength. To achieve the best performance, it is recommended to prepare the application surfaces using the specific adhesion promoter, Art. TS100

# CHD

## *Design*

The soft lines and mechanical technology make products in the CHD series perfect for any type of furnishings.

TÜV certification and the available finishes are quickly able to meet the most particular requests.

Suitable for glass thicknesses from 6 to 10 mm, the CHD series offers standard configurations as well as numerous opportunities for customisation due to different combinations of hinges, locks, knobs, clamps, and stabilizer bars.

## CHD Hinges

CHD hinges are the functional heart of the CHD series.

The hinge body is made of cast brass, while the components are mechanically processed.

Cap on one side to cover the screws fixing the hinge on the glass.

Adhesive seals to facilitate positioning of the hinge on the glass.

**CLOSING RETURN**  
Automatic return to the zero position in the last 30°.

**CORRECTION 10°**  
Correction of the door angle  $\pm 10^\circ$  upon installation.

**ANGLE OF ROTATION**  
Angle of rotation from  $+90^\circ$  to  $-90^\circ$ .  
With rest point at  $0^\circ$  and stops at  $-90^\circ$  and  $+90^\circ$ .

**NO VISIBLE SCREWS**

**TWO VERSIONS FOR GLASS WITH THICKNESS FROM 6 TO 12 mm**

The CHD SERIES can be used for glass with thickness from 6 to 12 mm thanks to hinges and locks in two versions, small and large. Depending on the chosen glass, it is possible to select the related hinge

Adhesive finishing screw-cover cap

# CER

## *Design*

The classic that never goes out of style.  
The CER series guarantees familiarity and the security of a tested product that is always up to date.

The CER line also provides wide opportunities for customisation with the various available finishes.  
Adapting to glass from 6 to 10 mm thick, the range covers complete standard systems and allows for customisation due to the different combinations of hinges, clamps and knobs.

*/4*  
Bronze

*/3*  
Brushed nickel

# CER

## *CER Hinges*

CER hinges are the functional heart of the CER SERIES.

They are produced from brass bars. The accessories are made of AISI 304, while the brass joints coated internally with a self-lubricating plastic material, leading to greater durability.

Additional die-cut PVC seals for mounting glass with thickness from 6 to 10 mm.

**ANGLE OF ROTATION**  
 Angle of rotation from +90° to -90°. With rest point at 0° and stops at -90° and +90°.

**VERSION FOR GLASS WITH THICKNESS FROM 6 TO 10 mm**

With a single model, doors with thickness from 6 to 10 mm can be made

**WALL/GLASS**  
with side plate

**WALL/GLASS**  
with central plate

**GLASS/GLASS**  
90° corner

**GLASS/GLASS**  
in-line

**GLASS/GLASS**  
135°

**GLASS/GLASS SAFETY**

**GLASS FIXING WITH FLAT HEAD SCREWS**

Material: Brass  
 Recommended hole size Ø9 mm  
 Finish: /1 /3

Art.	For glass	Qty
<b>MF12</b>	From 6 to 12 mm	1 Pc

**GLASS FIXING WITH COFIS20**

Material: Brass and AISI 304 steel  
 Recommended hole size Ø16–17 mm, 90° countersink  
 Finish: /1 /3  
 Recommended tool Art. UT250

Art.	For glass	Qty
<b>MF10</b>	From 8 to 12 mm	1 Pc

**WALL FIXING**

Material: Brass

Finish: /1 /2 /3 /R2

Art.	Qty
<b>MF02</b>	1 Pc

**ADJUSTABLE GLASS FIXING**

Material: Brass

Finish: /1 /2 /3 /R2

Art.	For glass	Qty
<b>MF04</b>	From 6 to 10 mm	1 Pc

**T-SHAPED CONNECTOR**

Material: Brass

Finish: /1 /3

Art.	Qty
<b>MF05</b>	1 Pc

**THROUGH GLASS FIXING**

Material: Brass

Finish: /1 /3

Art.	For glass	Qty
<b>MF06</b>	From 6 to 10 mm	1 Pc

**ARTICULATED JUNCTION**

Material: Brass

Finish: /1 /3

Art.	Qty
<b>SAS020</b>	1 Pc

**SUPPORT FOR WALL ANCHORING FOR SAS020**

Material: Brass

Art.	Qty
<b>MFBOC</b>	1 Pc

**TELESCOPIC WALL/GLASS STABILIZER BAR**

Material: AISI 304 steel and brass

Finish: /1 /15\*

\* only for Art. MF600H

Art.	For glass	Qty
<b>MF600A</b>	From 6 to 8 mm	1 Pc
<b>MF600B</b>	From 10 to 12 mm	1 Pc
<b>MF600H</b>	Only bar	1 Pc

**45° TELESCOPIC WALL/GLASS STABILIZER BAR**

Material: AISI 304 steel and brass

Finish: /1

Art.	For glass	Qty
<b>MF645A</b>	From 6 to 8 mm	1 Pc
<b>MF645B</b>	From 10 to 12 mm	1 Pc

**TELESCOPIC CEILING/GLASS STABILIZER BAR**

Material: AISI 304 steel and brass

Finish: /1 /15\*

\* only for Art. MF300V

Art.	For glass	Qty
<b>MF300A</b>	From 6 to 8 mm	1 Pc
<b>MF300B</b>	From 10 to 12 mm	1 Pc
<b>MF300V</b>	Only bar	1 Pc

### TESA® ACX<sup>plus</sup> DOUBLE-SIDED TAPE

Transparent double-sided tape for structural fixing of glass, steel and aluminium. The paper liner makes manual application of the tape easier. Solid, high performance backing with excellent viscoelastic properties and high bonding power, dissipation of static and dynamic stresses, plus high resistance to temperatures, humidity, UV rays, and chemical agents. Maximum operating temperature 100°C; peak temperature 200°C (max. 20 minutes). Recommended for glass/glass and glass/metal bonding: ideal for compensating different thermal expansions without losing strength. To achieve the best performance, it is recommended to prepare the application surfaces using the specific adhesion promoter, Art. TS100

# 500 Series Gaskets

*The resistance of a gasket*  
*The beauty of a finish*

One model for every use.

Choose from among balloon and magnetic gaskets or gaskets with lip deflector or classic straight lip.

The GM500 line comes complete for any type of use.

The flexibility of PVC, the beauty of the finishes.

Add a touch of style to your shower.

The GM500 line is available in black, matt aluminium, polished aluminium and brushed stainless steel.

**DEGREASING WIPE**

Disposable isopropyl alcohol wipe

Art.	Q.ty
<b>GSLSVL</b>	1 Pc

**FIXGLASS 1000**

Surface preparative for UV bonding.

Product to clean glass before bonding.

This is a concentrated alcohol solution (more than 99%)

It cleans and degreases glass, metal, marble.

ON/OFF nozzle

PRODUCT WITH NO EXPIRY DATE. STORE IN A COOL, SHADY ENVIRONMENT. USE NON-WOVEN TEXTILE CLOTHS FOR APPLICATION.

WARNING: GLOVES RECOMMENDED.

FOR PROFESSIONAL USE

Art.	Size	Qty
<b>FX1000</b>	500 ml	1 Pc

**NON-WOVEN TEXTILE CLOTH**

Product to clean glass before bonding.

Does not leave surface residue.

When used with FIXGLASS 1000, it removes dirt and grease, leaving no streaks.

Art.	Description	Qty
<b>FXTNT01</b>	400 x 250 mm - 50 Cloths	1 Pc

**SILANE GLASS PRIMER 3M VHB**

Adhesion promoter with silane to prepare glass prior to application of VHB two-sided tape.

Procedure:

- The surface must be clean, smooth and dry
- Wet a cloth with the primer
- Apply the primer to the surface, wiping the cloth in only one direction
- Dry the product with a clean, dry cloth immediately after application

### SHEARS FOR CUTTING GASKETS

Material: steel with slip-proof handle  
 Blade length 50 mm  
 With safety latch  
 Ambidextrous use.

Art.	Qty
<b>GMPINZ</b>	1 Pc

### SHEARS WITH GRADUATED BASE FOR CUTTING GASKETS

Material: steel with slip-proof handle  
 Graduated base for inclined cuts  
 Blade length 50 mm  
 With safety latch  
 Ambidextrous use.

Art.	Qty
<b>GMPINZ02</b>	1 Pc

### STOPVAPOR

The StopVapor defogging panel guarantees perfect clarity of the mirror surface where it is applied.

StopVapor is self-adhesive, meets European safety regulations (EN 60335) and bears CE marking.

Safety standards: This device is exclusively for interior use. Avoid direct contact with water. Install only for intended uses. Do not fold the heating sheet.

Do not apply to metal, plastic, wood, cardboard surfaces. Apply only to mirrors.

Do not install on mirrors with holes.

Maintain a distance of 5 mm between the mirror and wall.

Power cable supplied without plug.

Wiring must be done by qualified personnel.

**Warning! If the heating sheet is removed, it CANNOT be reused.**

### PROTECTIVE ADHESIVE FILM FOR MIRRORS

MACbak 7000 is a polyolefin fabric, spread with an acrylic adhesive, rolled on itself with no protection.

When applied to the back of a mirror, MACbak 7000 meets the requirements of American standard Z97.1-987 and British standard BS6206, category A.

ADHESIVE PERFORMANCE	Average values	Method used
Initial tack (N)	12	FTM 9
Peeling (N/25 mm) on stainless steel		
- 30 mins	10	FTM 1
- 24 hours	12	
Adhesion (hours)	150	FTM 8

### TAPE PROPERTIES

Thickness (tape-adhesive)	135 µm	ISO 534
Breaking strength (N)	150	ASTMD 2261
Tensile strength (N/15 mm)	SM200	DIN 53455
	ST 110	

### TEMPERATURE RESISTANCE

Minimum application temperature	0°C
Operating temperature range	-40°C/+80°C

### CHEMICAL RESISTANCE

(after 24 hours of immersion)

Water	Excellent
Salt water	Excellent
2% detergent	Excellent
SAE 30 oil	Good
Benzene	Good

## FINISHES

**/1**  
Chrome

**/2**  
Gold

**/3**  
Brushed nickel

**/4**  
Bronze

**/5**  
White

**/6**  
Matt black

**/7**  
Matt chrome

**/8**  
Brushed steel

**/9**  
Machining steel (CNC)

**/10**  
Raw aluminium

**/15**  
Polished steel

**/24**  
Brushed steel effect

**/45**  
Matt aluminium effect

**/56**  
Grey

**/65**  
Matt black

**/66**  
Champagne aluminium

**/67**  
Dark brushed bronze aluminium

**/83**  
PVD brushed steel

**/88**  
Brushed steel effect aluminium

**/89**  
Galvanised iron

**/90**  
Machining aluminium

**/91**  
Polished aluminium

**/92**  
Matt nickel

**/93**  
Brass coated

**/94**  
Brushed chrome

**/95**  
Nickel-coated

**/97**  
Matt aluminium

**/99**  
Brushed gold

**/R2**  
RAL9005 matt black

**/R6**  
RAL9016 matt traffic white

**/R13**  
RAL7016 matt anthracite grey

**/RAL**  
RAL9010 polished white
