Quality creates cohesion ...for over 140 years

Founded in Berlin in 1881 by Hermann Otto as a window putty manufacturer, the company has been producing silicone sealants since the early 1960s. Adhesives based on polyurethanes, silane-terminated polymers (hybrid) and acrylates round off the product range. The sealants and adhesives are developed in OTTO's own laboratories and marketed under the brand names of OTTOCOLL® (sealants), OTTOCOLL® (adhesives) and Novasil® (industrial applications). A broad range of special products facilitates solutions to complex problems.

As a manufacturer, OTTO is synonymous with top expertise in sealing and adhesive technology in industry and trade across all sectors. With its products, most of which are premium, OTTO has done more than just secure market leadership in its sector; it is also considered a driver of innovation in many fields due to its quality and performance.

A close partnership with its customers provides the precondition for OTTO satisfying the needs of discerning customers. Sales currently occur through more than 40 field staff employees. OTTO is appreciated as a socially committed, reliable employer by its around 490 employees. Modern production plants and an attractive administration building provide the perfect working atmosphere from both a profession and social point of view, and create the best conditions for employees who are both satisfied and motivated.

With the large training rooms, the OTTO training centre offers plenty of room to hold theoretical as well as practical seminars and training sessions on all topics relating to sealants and adhesives.

OTTO is expanding its production capacities by building a new production plant. Following a construction period lasting just 18 months, the first stage of construction's fully automatic production line was commissioned on schedule in late summer 2020.

OTTO – quality creates cohesion

Product overview

OTTOSEAL® sealants

Acrylic

A205 OTTOSEAL® A205	24
The premium acrylic sealant	
A210 OTTOSEAL® A210	25
The painters' acrylic	
A215 OTTOSEAL® A215	26
The grainy crack and repair filler	
A221 OTTOSEAL® A221 Parkett	37
The parquet joint sealant	
A225 OTTOSEAL® A225	55
The acrylate-based sealant for mitres	
A250 OTTOSEAL® A250	27
The roofers' and tinsmiths' acrylic	
A710 OTTOSEAL® A710	28
The acrylic sealant for RAL assembly inside	

Hybrid

M350 OTTOSEAL® M350	56
The hybrid sealant for glazing

The OTTO360° service package

The OTTO360° service package **More than sealants and adhesives**

As an OTTO customer, you get more than premium quality sealants and adhesives. You also benefit from a comprehensive service package that supports you in your daily work and makes it noticeably easier. Whether it's advice, ordering and delivery or equipping our retailers on site, with our OTTO360° service package we always try to offer our customers the best possible support in all areas – from professionals for professionals.

The perfect advice

Do you have any questions about choosing the right OTTO sealant and adhesive for your application or about professional processing? The experts from our application consulting service will be happy to help you:

☎ +49 8684 908-5300
@ international@otto-chemie.com

Monday to Thursday: from 7:00am – 4:00pm
Friday: from 7:00am – 1:00pm

The OTTO Colour Tables

For a visually flawless end result of your work, the selection of the appropriate colour shade is crucial. For this purpose, we offer colour tables with original dabs of our sealants. This way you are sure to choose the right colour. For easy use directly on site, we offer our special fabricator colour tables, which can be bent and thus held directly against the hard joint for colour matching.

The OTTO app

Whether iOS or Android: With the OTTO app for smart-phones and tablet PCs you always have the solution to all application issues at your side. Product search, consumption calculator, colour recommendation, order, contact – and if you wish to be informed in good time about the latest news, simply activate push notifications.

[Download now via the App Store or Google Play.](#)

The Adhesive Compass

Want to find the right adhesive for your application quickly and easily? No problem! Simply select the substrates to be bonded as well as the type of bonding and you will be recommended the right adhesives for your application.

www.otto-chemie.com/en/adhesive-compass

Colour recommendations for hard grout

Do you want to make sure that the hard grout harmonises perfectly with the sealant colour? We regularly test the most common hard grouts available on the market and compare them with the colours of our OTTO sealants. The recommendations on which sealant colour goes with which hard grout are available at any time on our website and in the app.

This saves you a long search and comparison and guarantees a visually perfect end result.

www.otto-chemie.com/en/colour-recommendations

The online order form

Order online around the clock with the OTTO order form. Use our OTTO order form to be flexible with your time and easily put together the products you want.

www.otto-chemie.com/en/customer-order-form

The OTTO360° service package

In addition to the services presented here, OTTO offers a wide range of other additional services and combines them in a diverse service package. You can find more information about this and how you can benefit from it on our website.

Bathroom and swimming pool sealants

OTTOSEAL® S 18 SPECIAL

The swimming pool silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Extremely resistant to continuously wet conditions
- ▶ Resistant to chlorine and salt water
- ▶ Contains extra fungicide – High resistance to mould infestation
- ▶ Very good adhesion on many substrates even without primer (see the primer table)
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ High resistance to notches and tearing – Resistant to high mechanical stresses
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of swimming pools and -baths as well as elastic jointing on the pool edges

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 14+17+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
 grey	S18-04-C02
 silk grey	S18-04-C77
 transparent	S18-04-C00
 white	S18-04-C01
Packaging unit	20
Pieces per pallet	1200

Additional useful information

For underwater joints certain prerequisites must be met to ensure optimum adhesion: The joint width should preferably be 10 – 15 mm and joint depth should be limited to approximately 8 – 10 mm by backfilling material.

Prior to sealing, the sides of the joints must be thoroughly cleaned of loose and dusty particles, residual mortar and contamination from oily or greasy substances. The sides of the joints must also be dry because a film of moisture on the surface will act like a release agent. The joint edges should be masked. Mineral, absorbent joint sides should be treated with OTTO Primer 1218, applied undiluted to the sides, using a paintbrush. After airing the primer and injecting OTTOSEAL® S 18, the sealant must be smoothed within approx. 6 minutes before a skin starts to form, using a tool moistened with OTTO smoothing agent.

Ideally, the pool should not be (re)filled until two weeks after the joints have been sealed with OTTOSEAL® S 18.

After the sealant has cured completely and the pool is filled with water for the first time it should be chlorinated immediately with a 2 mg/l intermittent chlorination during the first 2 days. During this time the pH value should be adjusted to between 7.0 and 7.2 to achieve the highest possible effect of the disinfectant. For operation thereafter the concentration of free chlorine should be 0.3 – 0.6 mg/litre (warm water whirlpool 0.7 – 1.0 mg/litre) and the pH value between 6.5 and 7.6 (ideally 7.0 – 7.2). The water circulation should be adjusted so that the water constantly runs over the overflow edge of the pool. Alternative methods, such as UV radiation or ozonisation do not have sufficient sustained-release-effect to prevent a fungus attack.

- The colour **adria blue** is on stock in OTTOSEAL® S 70/S 140. A wide OTTOSEAL® S 70/S 140 colour range is available for natural stone applications in permanently wet areas.

★★★★★
PREMIUM

The premium bathroom silicone

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- ▶ Excellent workability properties – Excellent smoothing and modelling capabilities
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Contains fungicide and bacteriostatic – Resistant to mould and bacteria
- ▶ Available in matte colours – Harmonises perfectly with matte surfaces

Fields of application

- ▶ Sealing of expansion and connection joints in floor and wall areas
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ Sealing double glazings/glass modules

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 4: PW INT 12.5 E
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 3-1+3-2+14+31+35 (IVD = German industry association sealants)

OTTOSEAL® S 130 **SPECIAL**

The environmentally friendly bathroom silicone

1-component silicone sealant based on alkoxy, neutral cross-linking

For indoor and outdoor application

Characteristics

- ▶ Contains the OTTO Fungitect® Silver technology – Health and ecologically harmless mould protection
- ▶ Low odour – No odour nuisance
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of expansion and connection joints in floor and wall areas
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ For jointing on ceramic tiles and natural stone

Standards and tests

- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 1: F EXT-INT 20 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ Declaration in "baubook" Austria
- ▶ French VOC-emission class A+
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 3-1+3-2+14+21+23+27+31+35 (IVD = German industry association sealants)

The hotel and spa silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Highly active fungicide plus innovative OTTO Fungitect® Silver Technology – Double protection against mould infestation
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ High resistance to notches and tearing – Resistant to high mechanical stresses
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Special silicone for sealing and jointing in hygiene areas with high stress on the silicone joints, e.g. in wet rooms, in public shower and bathing areas, in swimming pool complexes/leisure centres, in stadiums, gymnasiums, hospitals, thermal baths, spa areas, hotel bathrooms, etc.
- ▶ For jointing on ceramic tiles and natural stone in constantly wet areas
- ▶ Sealing of swimming pools and -baths as well as elastic jointing on the pool edges
- ▶ Well suitable for floor joints

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT 25 LM/F EXT-INT CC 20 LM
- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 4: PW INT 12,5 E
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)

Additional useful information

Professional tips for the renovation of joints:

For a professional renovation of joints it is absolutely necessary to remove all of the sealant damaged by mould thoroughly. It is also important to remove any residue from the bottom and the sides of the joint. Having done this the joint has to be treated with an Anti-Mildew Spray to kill off any leftover fungus spores. Only now the joint can be filled again.

If these measures are not carried out accurately, the sealant, even though it contains fungicides, can be infected by mould again shortly after because the spores are still in the joint.

Natural stone sealants

S70

OTTOSEAL® S70

★★★★★
PREMIUM

The premium natural stone silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Compatible with natural stone according to ISO 16938-1 – Does not cause any migratory staining on natural stone
- ▶ Available in matte colours – Harmonises perfectly with matte surfaces
- ▶ Available in “structure” colours – Harmonises perfectly with surfaces that are similar to stones
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of expansion joints in the area of floors, walls and facades
- ▶ Sealing of expansion joints in the facade area
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ Sealing of swimming pools and -baths as well as elastic jointing on the pool edges
- ▶ For the external sealing of mirrors in connection with natural stone
- ▶ For jointing on ceramic slabs and natural stone in exterior areas
- ▶ Sealing and jointing on marble and all natural stones, e. g. sandstone, quartzite, granite, gneiss, porphyry etc. in interior and exterior areas
- ▶ Sealing of lacquered and enamelled glass
- ▶ Movement-compensating bonding of natural stone on metal, e. g. stairs on a metal construction

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT 25 LM/F EXT-INT CC 20 LM
- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT 25 LM – applies only to the matt shades of OTTOSEAL® S 70 – all other shades comply with PW INT 12,5 E
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to ISO 16938-1 of SKZ Würzburg (Testing for migratory staining of sealants on natural stone)
- ▶ Tested according to ASTM C 1248 by DL Laboratories, New York (Testing for migratory staining of sealants on natural stone)
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+

S80

OTTOSEAL® S80 SPECIAL

The low odour natural stone silicone

1-component silicone sealant based on alkoxy, neutral cross-linking
For indoor and outdoor application

Characteristics

- ▶ Low odour – No odour nuisance
- ▶ Compatible with natural stone according to ISO 16938-1 – Does not cause any migratory staining on natural stone
- ▶ Available in matte colours – Harmonises perfectly with matte surfaces
- ▶ Also available in matte sanded colours – Harmonises perfectly with matte and cementitious joint surfaces
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of expansion joints in the area of floors, walls and facades
- ▶ Sealing of expansion joints in the facade area
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ For the external sealing of mirrors in connection with natural stone
- ▶ For jointing on ceramic slabs and natural stone in exterior areas
- ▶ Sealing and jointing on marble and all natural stones, e.g. sandstone, quartzite, granite, gneiss, porphyry etc. in interior and exterior areas
- ▶ Sealing of lacquered and enamelled glass
- ▶ Movement-compensating bonding of natural stone on metal, e.g. stairs on a metal construction

Standards and tests

- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT 12.5 E
- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25
- ▶ Tested according to EN 15651 – Part 3: S
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to ISO 16938-1 of SKZ Würzburg (Testing for migratory staining of sealants on natural stone)
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 3-1+3-2+9+14+23+25 +27+30+31+35 (IVD = German industry association sealants)

OTTOSEAL® S 117

The natural stone silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of expansion joints in wall and façade areas
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ Sealing and jointing on marble and all natural stones, e. g. sandstone, quartzite, granite, gneiss, porphyry etc. in interior and exterior areas

Standards and tests

- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 20 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E

Expansion and connection joint sealants

A 205

OTTOSEAL® A 205

★★★★★
PREMIUM

The premium acrylic sealant

1-component sealant based on acrylate
For indoor and outdoor application

Characteristics

- ▶ Permissible movement capability according to ISO 9046 (manufacturer's test) 18 % – Suitable also for large joint movements
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ No yellowing/greying
- ▶ Good UV-resistance – Long durability in exposed areas
- ▶ Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings
- ▶ Frost-resistant – Can be stored and transported in temperatures as low as -10°C for up to 48 hours

Fields of application

- ▶ Sealing of connection joints in the base, wall and ceiling areas, such as on window sills and shutter casings
- ▶ Sealing connection joints in outdoor areas

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT 12.5 P
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the IfT Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)

Pieces per pallet	1200	900	880

Additional useful information

OTTOSEAL® A 205 should be processed at surface temperatures ranging between +5 °C and +35 °C. Curing takes longer than usual at lower temperatures. This may lead to crack formation in the sealant caused by stress owing to changes to the lengths of the adjacent components before curing has been completed. Also at high temperatures there is the risk of an alteration caused by the thermal changes. If the components cool down too much shortly after the joint is formed, the sealant may be subject to a strong extension or compression which the still thin skin of the sealant cannot compensate.

Direct exposure to water owing to rain or draining water must be avoided during application and curing of OTTOSEAL® A 205 until a firm skin has formed on its surface. Once completely cured, OTTOSEAL® A 205 is resistant to rain and temperature-stable from -20 °C to +80 °C. It must be borne in mind that all dispersion acrylates contain water and are therefore sensitive to frost until fully cured.

OTTOSEAL® A210

The painters' acrylic

1-component sealant based on acrylate
For indoor and outdoor application

Characteristics

- ▶ 10 % permissible movement capability as per ISO 9046 (manufacturer's test)
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ No yellowing/greying
- ▶ Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings
- ▶ Frost-resistant – Can be stored and transported in temperatures as low as -10 °C for up to 48 hours

Fields of application

- ▶ Sealing of connection joints in the base, wall and ceiling areas, such as on window sills and shutter casings

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F INT 7.5 P
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 12+20+29+31+32+35 (IVD = German industry association sealants)

A215

OTTOSEAL® A215 **SPECIAL**

The grainy crack and repair filler

1-component acrylate crack and repair compound granular structure
For indoor and outdoor application

Characteristics

- › Granular structure – Adapts ideally to the plaster structure
- › No yellowing/greying
- › Can be painted and varnished – please observe application instruction in Technical Data Sheet
- › Good UV-resistance – Long durability in exposed areas
- › Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings
- › Frost-resistant – Can be stored and transported in temperatures as low as -10°C for up to 48 hours

Fields of application

- › For sealing/plastering masonry and plaster cracks in interior and exterior areas
- › Sealing of connection joints in the base, wall and ceiling areas, such as on window sills and shutter casings

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 12+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
 light grey	A215-04-C38
 white	A215-04-C01
Packaging unit	20
Pieces per pallet	1200

OTTOSEAL® A 250 **SPECIAL**

The roofers' and tinsmiths' acrylic

**1-component acrylate copolymer plastic sealant**

For indoor and outdoor application

Characteristics

- ▶ Immediately rainproof – Processable even in rain
- ▶ Compatible with bitumen
- ▶ Also bonding to damp surfaces
- ▶ Good UV-resistance – Long durability in exposed areas
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings

Fields of application

- ▶ Sealing of joints and seams in roof areas (e. g. on chimneys, metal profiles and parapet covers)
- ▶ Sealing of bitumen coats on masonry, concrete, etc.
- ▶ Barrier of building materials containing bitumen for the subsequent silicone sealant
- ▶ Sealing of corrugated roofing tiles made from fibre cement, metal, PVC, polyester and bitumen

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Suitable for applications according to IVD instruction sheet no. 12+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
 black	A250-04-C04
 crystal clear	A250-04-C30
 grey	A250-04-C02
 white	A250-04-C01
Packaging unit	20
Pieces per pallet	1200

**Additional useful information**

The sealing compound for bitumen can be used to seal dormers and penetrations as a barrier against building materials containing bitumen. It functions as an alternative to PE film barriers. For this purpose a sealant bead with a minimum thickness of 3mm is applied to the joint. Adhesion on moist, smooth, non-absorbant substrates is achieved even without using primers. The maximum joint width should not exceed 10mm and the sealant is only suitable for joints that show little movement, due to its plastic properties.

Because of its excellent adhesive power it tends to become stringy which can be avoided by jerking the cartridge away. OTTOSEAL® A 250 remains slightly sticky; therefore face joints must be sealed afterwards with OTTOSEAL® S 110 or OTTOSEAL® S 120, which cure with non-sticky surfaces to protect the sealant surface from being soiled.

OTTOSEAL® A 250 is not suitable for Styropor® or Styrodur®, for building expansion joints, floor and skirting board joints as well as for sealants for underwater use.

A 710

OTTOSEAL® A 710 **SPECIAL**

The acrylic sealant for RAL assembly inside

1-component sealant based on acrylate
For indoor application

Characteristics

- › Low vapour permeability – Complies with the requirements of the RAL assembly guideline
- › Low odour – No odour nuisance
- › Can be painted and varnished – please observe application instruction in Technical Data Sheet
- › Permissible movement capability according to ISO 9046 (manufacturer's test) 18% – Suitable also for large joint movements
- › Frost-resistant – Can be stored and transported in temperatures as low as -10 °C for up to 48 hours

Fields of application

- › For window and door mounting **INSIDE**
- › For lasting airtight inside sealing of joints between windows and construction elements to be used in combination with OTTOSEAL® P 720 and OTTOSEAL® S 730 (for exterior application)

Standards and tests

- › Tested according to EN 15651 – Part 1: F EXT-INT 12.5 P
- › Tested fire behaviour in accordance with EN 13501: class E
- › Tested according to "Air impermeability and driving rain resistance of joints between window and construction parts after simulated short-term strain" by the ift Rosenheim, Germany (Institute for window techniques)
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 9+12+24+31+35 (IVD = German industry association sealants)

OTTOSEAL® M 360

The hybrid sealant for building joints

1-component hybrid polymer STP sealant
For indoor and outdoor application

Characteristics

- ▶ Good weathering and ageing resistance
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Low odour – No odour nuisance
- ▶ Silicone-free
- ▶ Free of isocyanates
- ▶ Tack-free surface after approx. 6 hours – Less risk of contamination
- ▶ Temperature resistance from -40 to +90 °C

Fields of application

- ▶ Sealing of building construction joints according to DIN 18540-F
- ▶ Sealing of joints on façades, metal constructions
- ▶ Expansion joints on prefabricated concrete and cellular concrete units
- ▶ Bonding of OTTO Window Tapes BAB-V and BAB-VD on masonry, concrete, cellular concrete etc.
- ▶ Connection to a structure, e.g. connection to a window frame, doors, gates and drywall to the structure such as wall opening as well as transition areas e.g. from a concrete wall to a wooden stud wall/glass partition and tiled stoves partition.
- ▶ Closure of cracks and holes in façades and interior walls, such as in scaffolding/paintwork

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM/ ISO 11600-F-25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Component test "Airtightness and driving rain resistance of a sealant system between window and structural part according to ift-guideline MO-01"
- ▶ Accumulation water – Testing according to the guideline "Building waterproofing – Connection to floor-deep windows and doors, Part 2" together with Remmers waterproofing system "Liquid waterproofing with fleece carrier"
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 7+9+12+19-1+20+22+24+27+29+31+32+35 (IVD = German industry association sealants)

OTTOSEAL® P 720 **SPECIAL**

The PU sealant for RAL assembly outside

1-component sealant based on polyurethane
For outdoor application

Characteristics

- ▶ Complies with the requirements of the RAL assembly guideline (e.g. high water vapour permeability and driving rain tightness) – Complies with tender requirements for component-tested systems and installations
- ▶ Good weathering and ageing resistance
- ▶ Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Silicone-free
- ▶ Cures without bubble formation

Fields of application

- ▶ For window and door mounting OUTSIDE
- ▶ Water permeable sealing of external joints between windows and construction parts resistant to driving rain to be used in combination with OTTOSEAL® A 710 (for the interior application)

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to "Air impermeability and driving rain resistance of joints between window and construction parts after simulated short-term strain" by the ift Rosenheim, Germany (institute for window techniques)
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 9+12+24+27+31+35 (IVD = German industry association sealants)

Packaging	310 ml aluminium cartridge	580 ml aluminium foil bag
● concrete grey	P720-20-C56	on request
○ white	P720-20-C01	P720-08-C01
Packaging unit	20	20
Pieces per pallet	1200	600

OTTOSEAL® A 710

p. 28

S 115

OTTOSEAL® S 115

The construction silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- › Excellent weathering, ageing and UV-resistance
- › Contains fungicides – Resistance to mould infestation
- › Good compatibility with paints according to DIN 52452 (not paintable) – No interaction with existing and adjacent coatings
- › Does not cause corrosion on unprotected metal surfaces

Fields of application

- › Sealing of joints on windows and doors made of wood, metal and plastic
- › Expansion joints on prefabricated concrete and cellular concrete units
- › Sealing of joints on façades, metal constructions
- › Sealing expansion and connection joints in bathroom areas

Standards and tests

- › Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- › Tested according to EN 15651 – Part 3: XS 1
- › Tested fire behaviour in accordance with EN 13501: class E
- › According to the requirements of DIN 18540-F
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 3-1+3-2+7+9+14+19-1+20+24+25+27+29+31+32+35 (IVD = German industry association sealants)

**OTTO product tip**

OTTOSEAL® A 710

p. 28

**Fields of application**

- ▶ For window and door mounting OUTSIDE
- ▶ Water permeable sealing of external joints between windows and construction parts resistant to driving rain to be used in combination with OTTOSEAL® A 710 (for the interior application)

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to "Air impermeability and driving rain resistance of joints between window and construction parts after simulated short-term strain" by the IfT Rosenheim, Germany (institute for window techniques)
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 9+24+27+31+35 (IVD = German industry association sealants)

Floor sealants

OTTOSEAL® A 221 Parkett

The parquet joint sealant

1-component acrylate sealant

For indoor application

Characteristics

- ▶ Silicone-free according to DIN 18356 – No interactions with commercially available parquet coatings
- ▶ Grindable and paintable after curing – Optically flawless joint adaptation
- ▶ Store and transport frost-free

Fields of application

- ▶ Joint compound for parquet, laminate floors, wooden floor boards and cork floors
- ▶ Joint compound for floor and skirting boards, door sills and other structural components
- ▶ Joint compound for repair joints on wood

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 8+12+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
● antique oak	A221-04-C700
● ash, pine, spruce, Eur. maple	A221-04-C105

Packaging unit	20
Pieces per pallet	1200

M390

OTTOSEAL® M390

The floor sealant

1-component hybrid polymer STP sealant
For indoor and outdoor application

Characteristics

- ▶ Very high mechanical strength, notch and tear resistance – Resistant to high mechanical stresses (e.g. to mechanical cleaning with high-pressure cleaners)
- ▶ Good resistance to influence of chemicals – Suitable for use in areas subject to heavy chemical exposure
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Cures practically without shrinkage – No reworking and no concave fillets that tend to become soiled
- ▶ Extremely elastic – Compensates movements
- ▶ Low odour – No odour nuisance
- ▶ Silicone-free
- ▶ Grindable and paintable after curing – Optically flawless joint adaptation
- ▶ Free of isocyanates
- ▶ Good weathering and ageing resistance

Fields of application

- ▶ Sealing of joints in parquet, laminate, wooden, cork, plastic and vinyl floors
- ▶ Sealing of mechanically highly loaded movement and connection joints, which are exposed to stationary loads or rolling traffic, e.g. in warehouses and production halls, workshops, yards, car washes, parking decks, underground car parks etc.
- ▶ Sealing of chemically heavily loaded floor and connecting joints, e.g. in dairies, abattoirs, beverage and food production plants, canteen kitchens, etc.
- ▶ Stress-equalising sealing of floor and connection joints in interior and exterior areas on pedestrian paths, balconies, terraces and public areas
- ▶ Sealing of movement joints between concrete slabs

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25
- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT CC 25 HM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Suitable for applications according to IVD instruction sheet no. 1+8+21+35 (IVD = German industry association sealants)

OTTOSEAL® S34 SPECIAL

The floor silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Very good resistance to influence of chemicals – Suitable for use in areas subject to heavy chemical exposure
- ▶ Very high mechanical strength, notch and tear resistance – Resistant to high mechanical stresses (e.g. to mechanical cleaning with high-pressure cleaners)
- ▶ High temperature resistance up to +265 °C – Suitable for special thermal requirements
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ Sealing of chemically heavily loaded floor and connecting joints, e.g. in dairies, abattoirs, beverage and food production plants, canteen kitchens, etc.
- ▶ Sealing of mechanically highly loaded movement and connection joints, which are exposed to stationary loads or rolling traffic, e.g. in warehouses and production halls, workshops, yards, car washes, parking decks, underground car parks etc.

Standards and tests

- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 1 +19-1+21+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	400 ml aluminium foil bag
● anthracite	S34-04-C67	on request
● dust grey	S34-04-C89	on request
● sanitary grey	S34-04-C18	S34-07-C18
Packaging unit	20	20
Pieces per pallet	1200	900

Additional useful information

Correct execution of floor joints depends both on correct dimensioning and on the use of a suitable sealant. Dimensioning results from the distance between joints, mechanical load and the thermal linear expansion of the building materials.

In accordance with IVD leaflet no. 1, the following dimensions apply for joints indoors and outdoors to sealants with a permitted total distortion of 25 %:

Distance between joints	Width of joints in indoor areas	Depth of joints in indoor areas
2,0m	10mm	10mm
4,0m	10mm	10mm
6,0m	10mm	10mm

Distance between joints	Width of joints in outdoor areas	Depth of joints in outdoor areas
2,0m	10mm	10mm
4,0m	15mm	10mm
6,0m	20mm	15mm

The joint width should be at least 10mm. The thickness of the sealant should be limited to a maximum of 15mm by backfilling the joints. Floor joints wider than 15mm, which are walked and driven over, should be covered with protective boards resp. be protected against mechanical damage to the sealant.

The extremely high resistance to chemicals of OTTOSEAL® S34, its very high notch-impact and tear toughness and its resistance to mechanical high pressure cleaning also contribute to its suitability for joints that are subject to a high degree of mechanical stress.

S51

OTTOSEAL® S51 ★★★★★ PREMIUM

The premium plastic floor silicone

1-component silicone sealant based on aminoxime MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Flame retardant – building material class B1 according to DIN 4102 and DIN EN ISO 4589 – Can be used under increased fire protection requirements
- ▶ Wide range of colours – Colour adapted to common floor coverings (e.g. PVC, rubber and linoleum)
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of floor and connection joints for plastic and design floor coverings made of rubber, linoleum, vinyl and PVC
- ▶ Sealing of similar and dissimilar working materials such as glass, stainless steel, aluminium and some plastics

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT CC 25 LM
- ▶ Tested according to DIN 4102-B1 – hardly inflammable between solid mineral building materials (wood research at the Munich Technical University)
- ▶ Tested according to DIN EN ISO 4589-2:1999 Plastics – Definition of the fire-behaviour due to the oxygen index (Bodycote Warringtonfire)
- ▶ Tested for applications in the cleanroom sector by the Institute for Hygiene Gelsenkirchen, Germany
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 1+11+31+35 (IVD = German industry association sealants)

Floor sealants

S 125

OTTOSEAL® S 125

The low-odour floor and sanitary silicone

1-component silicone sealant based on alkoxy, neutral cross-linking
For indoor and outdoor application

Characteristics

- ▶ Low odour – No odour nuisance
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Available in matte colours – Harmonises perfectly with matte surfaces
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing of floor and connection joints for plastic and design floor coverings made of rubber, linoleum, vinyl and PVC
- ▶ Sealing expansion and connection joints in bathroom areas
- ▶ For the external sealing of mirrors in connection with materials such as ceramic, metal, glass etc.
- ▶ Sealing of joints on windows and doors made of wood, metal and plastic
- ▶ Sealing of façades, parapet elements, roller blind housings and metal building constructions
- ▶ Sealing of movement joints between concrete slabs

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 4: PW INT 12.5 E
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Suitable for applications according to IVD instruction sheet no. 1+3-1+3-2+7+9+14+19-1+20+24+25+27+29+31+32+35 (IVD = German Industry association sealants)

Floor sealants

Fire protection and high temperature sealants

OTTOSEAL® S 17 **SPECIAL**

The neutral high temperature silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ High temperature resistance up to +285 °C
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ High temperature resistant and still elastic bonding and sealing, e. g. for cast member heating boilers, exhaust boxes, tile stoves etc.
- ▶ Also suitable for applications in automotive areas for engines and gearboxes

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
Color	red brown
Packaging unit	20
Pieces per pallet	1200

**Additional useful information**

The difference between the two high temperature silicones, OTTOSEAL® S 17 and OTTOSEAL® S 25, lies in the type of curing:

OTTOSEAL® S 17 is a neutral curing sealant based on oxime; OTTOSEAL® S 25 is an acetate curing sealant.

The high temperature resistance of OTTOSEAL® S 17 of up to +285 °C is complemented by the fact that the sealant is non-corrosive. The high degree of Shore-A hardness of approx. 35 is also indicative of the notch-resistant properties. These combined values result in a sealant that is suitable for use in heavy-duty applications, e. g. engines and transmissions.

S 25

OTTOSEAL® S 25 **SPECIAL**

The high temperature silicone

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- › High temperature resistance up to +300 °C

Fields of application

- › High temperature resistant and still elastic bonding and sealing, e. g. for cast member heating boilers, exhaust boxes, tile stoves etc.
- › Also suitable for applications in automotive areas for engines and gearboxes

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › UL 94 Flame Classification HB, RTI 105 °C, File No. E 176319
- › Suitable for applications according to IVD instruction sheet no. 31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
Color	red brown
Packaging unit	20
Pieces per pallet	1200

Additional useful information

The difference between the two high temperature silicones, OTTOSEAL® S 17 and OTTOSEAL® S 25, lies in the manner of curing: OTTOSEAL® S 17 is a neutrally curing sealant based on oxime; OTTOSEAL® S 25 is an acetate curing sealant.

The very fast curing and high adhesive power of OTTOSEAL® S 25 complement its extraordinarily high longterm temperature resistance of up to +300 °C.

Please note that the silicone can be processed at temperatures between +5 °C and +40 °C. The thicker the coating, the longer the silicone takes to vulcanize. For applications with coatings thicker than 15 mm please contact our technical department.

OTTOSEAL® S54 **SPECIAL**

The fire protection silicone B1

1-component silicone sealant based on aminoxime MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Flame retardant – building material class B1 according to DIN 4102 and DIN EN ISO 4589 – Can be used under increased fire protection requirements
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing melted asphalt screed
- ▶ Sealing and bonding of EPDM/rubber profiles
- ▶ Sealing of fire protection elements

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 4: PW EXT-INT CC 25 LM
- ▶ Tested according to DIN 4102-B1 – hardly inflammable between solid mineral building materials (wood research at the Munich Technical University)
- ▶ Tested according to DIN EN ISO 4589-2:1999 Plastics – Definition of the fire-behaviour due to the oxygen index (Bodycote Warringtonfire)
- ▶ Suitable for applications according to IVD instruction sheet no. 1+11+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
● black	S54-04-C04
● grey	S54-04-C02
○ white	S54-04-C01
Packaging unit	20
Pieces per pallet	1200

S94

OTTOSEAL® S94 SPECIAL

The neutral fire protection silicone B1

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Flame retardant – building material class B1 according to DIN 4102 – Can be used under increased fire protection requirements
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Good compatibility with paints according to DIN 52452 (not paintable) – No interaction with existing and adjacent coatings

Fields of application

- ▶ Sealing of structural components, that require an increased fire performance requirements (e.g. fire-resistant building components and fire-resistant glazing)

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested according to EN 15651 – Part 4: PW INT 12.5 E
- ▶ Tested according to DIN 4102-B1 – hardly inflammable between solid mineral building materials (wood research at the Munich Technical University)
- ▶ Tested according to DIN 25415, part 1 – very good decontamination properties of the sealant surface (German Materials Research and Testing Agency, 12200 Berlin, Germany)
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 9+11+20+24+27+29+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	580 ml aluminium foil bag
● black	S94-04-C04	on request
● grey	S94-04-C02	S94-08-C02
○ transparent	S94-04-C00	on request
○ white	S94-04-C01	S94-08-C01
Packaging unit	20	20
Pieces per pallet	1200	600

Additional useful information

Building material classes identify the fire performance of the individual building material and is not identical to the fire resistance classes, which identify the fire resistance of the complete component.

In addition to the building material classes according to DIN 4102, there exist also european classes according to DIN EN 13501. Currently, tests and evaluations of sealants have to be carried out according to DIN 4102. Please find the classes opposed in the following table (Source: IVD-instruction sheet no. 11).

Designation	Additional requirement: no smoke	Additional requirement: no burning drop-out/dripping	European class according to DIN EN 13501-1	Classification according to DIN 4102-1
Non-Combustible	X	X	A1	A1
	X	X	A2-s1 d0	A2
Flameresistant	X	X	B,C-s1 d0	B1
		X	B,C-s3 d0	
	X		B,C-s1 d2	
			B,C-s3 d2	
Normally flammable		X	D-s3 d0	B2
			E	
			D-s3 d2	
			E-d2	
Highly flammable			F	B3

The classes s1, s2 and s3 are additional requirements according to DIN EN 13501 – formation of smoke. The classes d0, d1 and d2 are additional requirements according to DIN EN 13501 – burning drop-out/dripping. The tests are carried out according to DIN EN 13823.

Special sealants

M380

OTTOSEAL® M380 SPECIAL

The hybrid for clean rooms and ventilation systems

1-component hybrid polymer STP sealant
For indoor and outdoor application

Characteristics

- › Silicone-free
- › Low odour – No odour nuisance
- › Can be painted and varnished – please observe application instruction in Technical Data Sheet
- › Contains fungicides – Resistance to mould infestation
- › Does not cause corrosion on unprotected metal surfaces
- › Good weathering and ageing resistance

Fields of application

- › Sealing of air condition and ventilation systems, for example kitchen exhaust ducts
- › For joints in cleanrooms and production areas with strict requirements to hygiene, e. g. electronic sector – chip production
- › For joints in production rooms for medicine and other medical items
- › Sealing of joints in refrigerated warehouses
- › Suitable for joints in hospitals and food processing companies

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › Tested for applications in the cleanroom area and in accordance with DIN EN ISO 846 by ISEGA Forschungs- und Untersuchungsgesellschaft mbH Aschaffenburg
- › Suitable for use in ventilation systems according to VDI 6022, sheet 1
- › Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	580 ml aluminium foil bag
● grey metallic	M380-04-C998	M380-08-C998
● RAL 7004	M380-04-C7004	M380-08-C7004
● RAL 9002	M380-04-C9002	M380-08-C9002
● RAL 9010	M380-04-C9010	M380-08-C9010
Packaging unit	20	20
Pieces per pallet	1200	600

OTTOSEAL® S27 **SPECIAL**

The silicone for food and drinking water

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- ▶ Tested for applications in the food and drinking water sector
- ▶ Good chemical resistance (e. g. to cleaning agents and disinfectants) – No damage by aggressive cleaning and disinfection
- ▶ High resistance to notches and tearing – Resistant to high mechanical stresses
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Sealing in the food sector, e. g. in dairies, abattoirs, beverage and food production plants, canteen kitchens etc.
- ▶ Sealing in the drinking water area between ceramic coatings

Standards and tests

- ▶ Positively tested for compatibility when in contact with food (by the Chemical Laboratory Dr. Stegemann, Georgsmarienhütte, Germany)
- ▶ Tested and licensed according to the KTW guidelines of the Federal German Environment Agency for the cold water area (elastic jointing between ceramic tiles)
- ▶ Tested and licensed according to the DVGW worksheet W 270 (elastic jointing between ceramic tiles)
- ▶ Declaration of no objection – tested for short-term contact with food (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 21+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
● grey	S27-04-C02
● RAL 7004	S27-04-C7004
○ transparent	S27-04-C00
○ white	S27-04-C01
Packaging unit	20
Pieces per pallet	1200

S67

OTTOSEAL® S67 SPECIAL

The low-odour silicone for clean rooms and ventilation systems

1-component silicone sealant based on alkoxy, neutral cross-linking

For indoor and outdoor application

Characteristics

- › Excellent metal adhesion – No pre-treatment on many metals
- › Low odour – No odour nuisance
- › Does not cause corrosion on unprotected metal surfaces
- › Good chemical resistance (e. g. to cleaning agents and disinfectants) – No damage by aggressive cleaning and disinfection
- › Contains fungicides – Resistance to mould infestation
- › Excellent weathering, ageing and UV-resistance

Fields of application

- › For joints in cleanrooms and production areas with strict requirements to hygiene, e. g. electronic sector – chip production
- › For joints in production rooms for medicine and other medical items
- › For joints in rooms with strict hygienic requirements and frequent use of cleaning agents and disinfectants, e. g. operating theatres, medical examination rooms, medical laboratories
- › Sealing of joints in refrigerated warehouses
- › Suitable for joints in hospitals and food processing companies
- › Sealing of air condition and ventilation systems, for example kitchen exhaust ducts

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › Tested for applications in the cleanroom area and in accordance with DIN EN ISO 846 by ISEGA Forschungs- und Untersuchungsgesellschaft mbH Aschaffenburg
- › Suitable for use in ventilation systems according to VDI 6022, sheet 1
- › Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 31+35 (IVD = German industry association sealants)

OTTOSEAL® S69 **SPECIAL**

The silicone for clean rooms and ventilation systems

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- › Good chemical resistance (e. g. to cleaning agents and disinfectants) – No damage by aggressive cleaning and disinfection
- › High resistance to notches and tearing – Resistant to high mechanical stresses
- › Excellent weathering, ageing and UV-resistance

Fields of application

- › For joints in rooms with strict hygienic requirements and frequent use of cleaning agents and disinfectants, e. g. operating theatres, medical examination rooms, medical laboratories
- › Suitable for joints in hospitals and food processing companies
- › Sealing of air condition and ventilation systems made of non-corrosive materials

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › Tested for applications in the cleanroom sector by the Institute for Hygiene Gelsenkirchen, Germany
- › Tested for compatibility when in contact with food (by the Chemical Laboratory Dr. Stegemann, Georgsmarienhütte, Germany)
- › Suitable for use in ventilation systems according to VDI 6022 (Ass. Of Germ. Engineers), sheet 1 tested according to DIN EN ISO 846 (by the Institute for Hygiene Berlin, Germany)
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 21+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	580 ml aluminium foil bag
● RAL 9002	S69-04-C9002	S69-08-C9002
● RAL 9010	S69-04-C9010	S69-08-C9010

Additional useful information

Test of resistance of OTTOSEAL® S69 to cleaning agents and disinfectants:

Pursept-FD 3% solution (Merz)	resistant
Bacillocid rasant 3% solution (Bode)	resistant
Biguanid Fläche/surface 3% solution (Dr. Schumacher)	resistant
Baccalin 3% solution (Bode)	resistant
Terralin 3% solution (S+M)	resistant
Incidin perfekt 3% solution (Ecolab)	resistant
Kohrsolin 3% solution (Bode)	resistant
Perform 3% solution (S+M)	resistant
Dismozon pur 3% solution (Bode)	resistant

The test have been carried out at room temperature.

Glass, window and façade sealants

OTTOSEAL® A 225

The acrylate-based sealant for mitres

1-component sealant based on acrylate
For indoor and outdoor application

Characteristics

- › Low odour – No odour nuisance
- › User-friendly – Can be removed if fresh and uncured by using water
- › Translucent (slightly cloudy) after curing – Ideal for all window colours
- › Can be painted and varnished – please observe application instruction in Technical Data Sheet
- › Frost-resistant -10°C/up to 48 hours

Fields of application

- › Sealing of frame joins and mitre cuts in metal construction and wooden windows

Standards and tests

- › French VOC-emission class A+
- › Meets the requirements for fire behavior according to EN 13501: Class E
- › Suitable for applications according to IVD instruction sheet no. 12+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
○ translucent	A225-04-C95
Packaging unit	20
Pieces per pallet	1200

M 350

OTTOSEAL® M 350 **SPECIAL**

The hybrid sealant for glazing

1-component hybrid polymer STP sealant
For indoor and outdoor application

Characteristics

- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Silicone-free
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Good weathering and ageing resistance

Fields of application

- ▶ Window pane sealing on wooden windows
- ▶ Sealing of joints on windows and doors made of wood, metal and plastic
- ▶ Sealing of pipe and antenna ducts
- ▶ Sealing of joints on façades, metal constructions
- ▶ Sealing of air condition and ventilation systems
- ▶ Suitable for glazing systems with putty fronting Va1 in accordance with DIN 18545/ÖNORM 3724

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25
- ▶ Tested according to EN 15651 – Part 2: G CC 25 HM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ According to the requirements of DIN 18545, stress group A and D
- ▶ According to the requirements of ISO 11600 G 25 HM
- ▶ Suitable for use in ventilation systems according to VDI 6022 (Ass. Of Germ. Engineers), sheet 1 tested according to DIN EN ISO 846 (by the Institute for Hygiene Berlin, Germany)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Suitable for applications according to IVD instruction sheet no. 9+12+20+24+27+29+31+32+35 (IVD = German industry association sealants)

Packaging	300 ml cartridge
● concrete grey	M350-03-C56

Packaging unit	12
Pieces per pallet	1152

OTTOSEAL® S7 **SPECIAL**

The weather sealing silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Compatible with insulating glass edge compound materials – see compatibility list
- ▶ Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Very good adhesion on many substrates even without primer (see the primer table)
- ▶ High resistance to notches and tearing – Resistant to high mechanical stresses
- ▶ User-friendly thanks to matt surface
- ▶ Long skin-formation – Long processing time
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ Specially developed for the weather sealing of structural glazing, angled glazing, timber-glass-composite elements, roof glazing and conservatories
- ▶ For jointing on glass elements
- ▶ Suitable for joints on insulating glass units

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ According to the requirements of DIN 18540-F
- ▶ According to the requirements of ISO 11600 F 25 LM

Packaging	310 ml cartridge	580 ml aluminium foil bag
● black	S7-04-C04	S7-08-C04
Packaging unit	20	20
Pieces per pallet	1200	600

S9

OTTOSEAL® S9 **SPECIAL**

The 1-component silicone sealant for insulating glass edges

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Very good adhesion on many substrates even without primer (see the primer table)
- ▶ High resistance to notches and tearing – Resistant to high mechanical stresses
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ Secondary edge sealing for manufacturing UV-resistant insulating glass units in connection with butyl rubber as primary sealing

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Tested according to EN 1279, part 2 with gas-filled multi-panel insulating glass with spacers made of aluminium and tested according to EN 1279, part 4, paragraphs 5.1 and 5.2 by the MPA Darmstadt, Germany
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	580 ml aluminium foil bag	20 l hobbock
● black	S9-04-C04	S9-08-C04	on request
Packaging unit	20	20	1
Pieces per pallet	1200	600	16

OTTOSEAL® S 10 **SPECIAL**

The silicone sealant for glass constructions

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- › Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- › Excellent weathering, ageing and UV-resistance
- › Very good adhesion on many substrates even without primer (see the primer table)
- › High resistance to notches and tearing – Resistant to high mechanical stresses
- › Does not cause corrosion on unprotected metal surfaces

Fields of application

- › Sealing of expansion joints in building construction
- › Specially developed for the weather sealing of structural glazing, angled glazing, timber-glass-composite elements, roof glazing and conservatories
- › For jointing on glass elements
- › Installation of X-ray protective glass

Standards and tests

- › Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- › Tested according to EN 15651 – Part 2: G CC 25 LM
- › Tested fire behaviour in accordance with EN 13501: class E
- › UL 94 Flame Classification HB, RTI 105 °C, File No. E 176319
- › Tested and recommended by Schott Desag AG Deutsches Spezialglas, D-31073 Grünenplan, for the installation of RD 50 and RD 30 X-ray protective glass
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 22+30+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
● black	S10-04-C04
○ transparent	S10-04-C00
○ white	S10-04-C01

Pieces per pallet	1200

S28

OTTOSEAL® S28 **SPECIAL**

The aquarium and glass block silicone

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- ▶ Suitable for freshwater and saltwater aquariums
- ▶ Complies with OECD 203 – Offers the highest possible safety standard for highly sensitive life forms
- ▶ High adhesive power
- ▶ Excellent weathering, ageing and UV-resistance

Fields of application

- ▶ Manufacture of all-glass aquariums and terrariums
- ▶ Bonding of glass blocks

Standards and tests

- ▶ According to DIN 32622, pt. 4.4.2.2 (Glass Aquaria)
- ▶ Non-toxic for fish according to OECD 203 (Acute Toxicity Test – tested by the Institute Fresenius, 65232 Taunusstein, Germany)
- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	400 ml aluminium foil bag	20 l hobstock	200 l drum

S50

OTTOSEAL® S50

The crystal-clear silicone

1-component silicone sealant based on acetate
For indoor and outdoor application

Characteristics

- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Cures to a crystal-clear silicone – For unobtrusive applications

Fields of application

- ▶ Glass construction, vitrines and shop windows

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 30+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
○ crystal clear	S50-04-C30
Packaging unit	20
Pieces per pallet	1200

OTTOSEAL® S72

The plastic silicone

1-component silicone sealant and adhesive based on alkoxy, neutral cross-linking
For indoor and outdoor application

Characteristics

- › Compatible with acrylic glass and polycarbonate – Does not cause stress cracks
- › Adhesion to many plastics without a primer (see primer table in the technical data sheet)
- › Does not cause corrosion on unprotected metal surfaces
- › Low odour – No odour nuisance
- › High resistance to notches and tearing – Resistant to high mechanical stresses
- › Excellent weathering, ageing and UV-resistance

Fields of application

- › Applications on glass, plastics and aluminium
- › Glass construction, vitrines and shop windows

Standards and tests

- › Meets the requirements for fire behavior according to EN 13501: Class E
- › Positively tested for compatibility when in contact with food (by the Chemical Laboratory Dr. Stegemann, Georgsmarienhütte, Germany)
- › Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 21+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
● RAL 7004	S72-04-C7004

OTTOSEAL® S 110

★★★★★
PREMIUM

The premium construction silicone

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Very good adhesion on many substrates even without primer (see the primer table)
- ▶ Highly abrasion-resistant and streak-free according to ift-guideline VE-04/2 – For non-streaky cleaning
- ▶ Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- ▶ Excellent early resistance to stress during component movements
- ▶ Good compatibility with paints according to DIN 52452 (not paintable) – No interaction with existing and adjacent coatings
- ▶ Does not cause corrosion on unprotected metal surfaces
- ▶ Contains fungicides – Resistance to mould infestation

Fields of application

- ▶ Expansion joints on prefabricated concrete and cellular concrete units
- ▶ Sealing of joints on façades, metal constructions
- ▶ Sealing of joints on windows and doors made of wood, metal and plastic
- ▶ Sealing double glazings/glass modules
- ▶ Window pane sealing on wooden windows
- ▶ For jointing on glass elements
- ▶ Sealing expansion and connection joints in bathroom areas

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested according to EN 15651 – Part 3: XS 1
- ▶ Tested according to EN 15651 – Part 4: PW INT 12.5 E
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to ift-guideline VE-04/2
- ▶ Tested according to FCBA (CTBA) L 114 (suitability of sealants for window pane sealing on wooden windows)
- ▶ According to the requirements of DIN 18540-F
- ▶ According to the requirements of ISO 11600 G 25 LM
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)

Additional useful information

The sealing of glass in wooden windows is subject to some important factors which are responsible for optimal sealing:

The excellent early resistance to stress is important to avoid cracks in the sealant. These can arise if, for example, the seal is formed in direct sunlight and at an increased temperature and thereafter the temperature drops drastically, forcing the sealant to follow the movements of the substrate, although it is not yet completely cured.

OTTOSEAL® S 110 and OTTOSEAL® S 120 develop a firm surface skin very quickly and can therefore follow the movements of the building after a very short time. Furthermore, it is extremely important that the sealant is compatible with the other building materials used for the wooden windows with which it comes into close contact with (e.g. lacquer paints/varnishes). These must not damage or modify the sealant (e.g. discolouring). Overpainting the sealant is not possible and, according to the relevant standards and guidelines, not even permitted for elastic jointing.

The abrasion resistance is tested according to ift directive VE-04/2. OTTOSEAL® S 110 and OTTOSEAL® S 120 meet the requirements. After smoothing the sealant, residual smoothing agent must be removed immediately; otherwise streaks can remain.

Prior to cleaning it for the first time the sealant must cure for at least three days to prevent the seal from being damaged. The surface of the sealant should be cleaned with a moist soft cloth using normal, commercial window cleaning agents.

S 112

OTTOSEAL® S 112 **SPECIAL**

The silicone sealant for window bars

1-component silicone sealant compound based on alkoxy, neutral cross-linking
For indoor application

Characteristics

- ▶ Low adhesion – Easy removability e.g. of the glass retaining strip
- ▶ Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- ▶ Good compatibility with paints according to DIN 52452 (not paintable) – No interaction with existing and adjacent coatings
- ▶ Low odour – No odour nuisance
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ For sealing and back filling of frames and window bars on windows and doors – improves the leak tightness. The filling material has less adhesion in comparison to standard glazing sealants, so its easier to remove the window bars for repair works.
- ▶ Avoids accumulation of condensation through incoming warm air and thus protects against humidity affecting the edge sealing, which could lead to damages to the wooden window frame
- ▶ For sealing on the window frame below the glass edge (position 4). Please avoid full surface contact with the isolation glass edge sealing in the rebate bond. Maximum 3mm overlap is permissible.
- ▶ For compatibility to IG-edge sealing materials please see our recent compatibility list. The up-to-date list can be downloaded from our website www.otto-chemie.com.

Packaging	310 ml cartridge	580 ml aluminium foil bag
○ transparent fair blue	S112-04-C8845	S112-08-C8845
Packaging unit	20	20
Pieces per pallet	1200	600

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+

OTTOSEAL® S 113 **SPECIAL**

The paintable silicone sealant for glazing

1-component silicone sealant based on oxime, neutral cross-linking, MEKO-free
For indoor and outdoor application

Characteristics

- ▶ Compatible with coatings according to DIN 52452 – No interaction with existing and adjacent coatings
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ Window pane sealing on wooden windows
- ▶ Sealing of joints on façades, metal constructions
- ▶ Sealing of joints on windows and doors made of wood, metal and plastic
- ▶ Expansion joints on prefabricated concrete and cellular concrete units

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ According to the requirements of DIN 18540-F
- ▶ Complies with the requirements of DIN 18545, stress group E
- ▶ French VOC-emission class A+

Packaging	310 ml cartridge

OTTOSEAL® S 120

★★★★★
PREMIUM

The premium glazing silicone

1-component silicone sealant based on alkoxy, neutral cross-linking

For indoor and outdoor application

Characteristics

- ▶ Highly abrasion-resistant and streak-free according to ift-guideline VE-04/2 – For non-streaky cleaning
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Low odour – No odour nuisance
- ▶ Compatible with PVB sheets according to the criteria of ift-guideline DI-02/1 – Suitable for processing VSG
- ▶ Very good adhesion on many substrates even without primer (see the primer table)
- ▶ Good compatibility with paints according to DIN 52452 (not paintable) – No interaction with existing and adjacent coatings
- ▶ Excellent early resistance to stress during component movements
- ▶ Available in matte colours – Harmonises perfectly with matte surfaces
- ▶ Contains fungicides – Resistance to mould infestation
- ▶ Does not cause corrosion on unprotected metal surfaces

Fields of application

- ▶ Window pane sealing on wooden windows
- ▶ Sealing of joints on façades, metal constructions
- ▶ Sealing of joints on windows and doors made of wood, metal and plastic
- ▶ Expansion joints on prefabricated concrete and cellular concrete units
- ▶ Sealing double glazings/glass modules
- ▶ For jointing on glass elements
- ▶ For the external sealing of mirrors in connection with materials such as ceramic, metal, glass etc.

Standards and tests

- ▶ Tested according to EN 15651 – Part 1: F EXT-INT CC 25 LM
- ▶ Tested according to EN 15651 – Part 2: G CC 25 LM
- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Tested according to ift-guideline VE-04/2
- ▶ Tested according to the BEMMA scheme for museum and show case equipment
- ▶ According to the requirements of DIN 18540-F
- ▶ According to the requirements of ISO 11600 G 25 LM
- ▶ KOMO certificate no. 33410 (The regulations as per NPR 3577 are to be observed)
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ Quality seal of the IVD (Industrial association for sealants, registered society), tested by the ift Rosenheim (Institute of window engineering, registered society)
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ According to regulation (EG) no. 1907/2006 (REACH)
- ▶ Suitable for applications according to IVD instruction sheet no. 7+9+10+13+14+19-1 +20+22+24+25+27+29+31+32+35 (IVD = German industry association sealants)

Hybrid adhesives

OTTOCOLL® M500

★★★★★
PREMIUM

The extremely water-resistant premium hybrid adhesive

1-component hybrid polymer STP adhesive
For indoor and outdoor application

Characteristics

- ▶ Extremely water-resistant – For bonds with high water exposure
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Also bonding to damp surfaces
- ▶ Elastic – Compensates movements
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Silicone-free
- ▶ Free of isocyanates

Fields of application

- ▶ Bonding of stone, natural stone and ceramic
- ▶ Bonding of lacquered and enamelled glass
- ▶ Bonding of OTTOFLEX® sealing strip/sealing and decoupling strip in the overlapping area and accessories such as sealing tape, corner tape and sealing sleeves (according to the requirements of ETAG 022 and tested according to abP principles)
- ▶ Bonding of mirrors on ceramic, glass, plastic, stainless steel, aluminium, wood, concrete, etc.
- ▶ Bonding of window sills, floor strips, decorative strips and stairs
- ▶ Bonding in body and vehicle construction, carriage and container construction, metal and device construction, ship building
- ▶ Bonding in food-related areas
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Tested in conjunction with OTTOFLEX® sealing strip/sealing and decoupling strip to issue a general building inspection certificate

The crystal-clear hybrid adhesive

1-component hybrid polymer STP adhesive
For indoor and outdoor application

Characteristics

- ▶ Crystal clear – For inconspicuous bondings
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Also bonding to damp surfaces
- ▶ Elastic – Compensates movements
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Silicone-free
- ▶ Free of isocyanates

Fields of application

- ▶ Bonding of stone, natural stone and ceramic
- ▶ Bonding of mirrors on ceramic, glass, plastic, stainless steel, aluminium, wood, concrete, etc.
- ▶ Bonding of window sills, floor strips, decorative strips and stairs
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

OTTOCOLL® M530 HiSpeed**SPECIAL**

The hybrid adhesive with very fast bonding

1-component hybrid polymer STP adhesive
For indoor and outdoor application

Characteristics

- › Handling strength after 20 minutes and functional strength after 3 hours – Fast continued work possible with thin adhesive layer and diffusion-open materials
- › High final strength – Resistant to high mechanical stresses
- › Compatible with natural stone – Does not cause greasy deposits on natural stones
- › Also bonding to damp surfaces
- › Elastic – Compensates movements
- › Can be painted and varnished – please observe application instruction in Technical Data Sheet
- › Silicone-free
- › Free of isocyanates

Packaging	310 ml cartridge
○ white	M530-04-C01
Packaging unit	20

M560

OTTOCOLL® M560 **PREMIUM**

The universal premium hybrid adhesive with very high initial adhesion

1-component hybrid polymer STP adhesive
For indoor and outdoor application

Characteristics

- ▶ Very high initial adhesion – No fixation required
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Also bonding to damp surfaces
- ▶ Fast thorough hardening – Stress can be applied to the bond quickly
- ▶ Elastic – Compensates movements
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Silicone-free
- ▶ Free of isocyanates

Fields of application

- ▶ Bonding of stone, natural stone and ceramic
- ▶ Bonding of lacquered and enamelled glass
- ▶ Bonding of mirrors on ceramic, glass, plastic, stainless steel, aluminium, wood, concrete, etc.
- ▶ Bonding of drywall stud frames for screwless assembly of metal rails/UW profiles
- ▶ Bonding of window sills, floor strips, decorative strips and stairs
- ▶ Bonding of rigid foam boards
- ▶ Bonding in body and vehicle construction, carriage and container construction, metal and device construction, ship building
- ▶ Bonding in food-related areas
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Tested fire behaviour in accordance with EN 13501: class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1^{PLUS} – very low emission

1-component hybrid polymer STP adhesive
For indoor and outdoor application

Characteristics

- ▶ Applicable by spatula – Apply quickly and easily with a toothed spatula
- ▶ Compensates for unevenness in rough bonding surfaces
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Also bonding to damp surfaces
- ▶ Elastic – Compensates movements
- ▶ Can be painted and varnished – please observe application instruction in Technical Data Sheet
- ▶ Silicone-free
- ▶ Free of isocyanates

Fields of application

- ▶ Bonding of wall cladding panels indoors, such as in sanitary, kitchen and catering areas and in cold storage rooms
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates
- ▶ Bonding of OTTOFLEX® sealing strip/sealing and decoupling strip in the overlapping area and accessories such as sealing tape, corner tape and sealing sleeves (according to the requirements of ETAG 022 and tested according to abP principles)

PU adhesives

P83

OTTOCOLL® P83 **SPECIAL**

The highly elastic PU adhesive

1-component adhesive based on polyurethane
For indoor and outdoor application

Characteristics

- ▶ Highly elastic – Compensates for high movements
- ▶ Extremely resilient to mechanical forces – Resistant to high impacts, shock loads and peeling loads
- ▶ Good resistance to influence of chemicals – Suitable for use in areas subject to heavy chemical exposure
- ▶ Does not foam – No weighting necessary
- ▶ Silicone-free

Fields of application

- ▶ Bonding in bodywork, wagon and container construction, metal construction and apparatus engineering, ship building
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Declaration of no objection – tested for use in food-related area (ISEGA Forschungs- und Untersuchungs-Gesellschaft mbH, Aschaffenburg, Germany)
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+

OTTOCOLL® P84 **SPECIAL**

The PU glue

1-component polyurethane adhesive flowable
For indoor and outdoor application

Characteristics

- ▶ Free-flowing
- ▶ Very high final strength – Resistant to high mechanical stresses
- ▶ Grindable and paintable after curing
- ▶ Foaming/gap bridging – Compensates minor unevenness

Fields of application

- ▶ Bonding garden furniture and window edges
- ▶ Manufacturing of laminated wood for non-load-bearing parts
- ▶ Bonding sandwich/composite boards, e.g. for partition walls, door parts, exterior walls for prefabricated houses, façade elements, vehicle superstructural parts etc.
- ▶ Producing finger joints

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Tested according to DIN EN 204-D4 weathering resistant bonding for wood and derived wood products by the ift Rosenheim, Germany (institute for window techniques)
- ▶ Tested according to DIN EN 14257 (WATT 91) – Bonding strength of sealants for wood and derived wood products (ift Rosenheim, Germany)
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

Packaging	500 ml plastic bottle	12l plastic canister
● fair beige	P84-30-C68	P84-32-C68

OTTOCOLL® P340 Rapid

SPECIAL

The very fast PU adhesive

1-component adhesive based on polyurethane
For indoor and outdoor application

Characteristics

- ▶ Very fast curing – Short pressing and fixing times
- ▶ Very high final strength – Resistant to high mechanical stresses
- ▶ Compatible with natural stone – Does not cause greasy deposits on natural stones
- ▶ Grindable and paintable after curing
- ▶ Foaming/gap bridging – Compensates minor unevenness

Fields of application

- ▶ Bonding of stone, natural stone and ceramic
- ▶ Bonding of insulating units, e.g. made of polystyrene, PVC, PU etc.
- ▶ Bonding of window sills, floor strips, decorative strips and stairs
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ According to the requirements of DIN EN 204-D4 to weathering resistant bondings of wood and derived wood products
- ▶ According to the requirements of DIN EN 14257 (WATT 91) to temperature-resistant bondings of wood and derived wood products
- ▶ EMICODE® EC 1 PLUS – very low emission
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

p. 182

1-component polyurethane adhesive flowable
For indoor and outdoor application

Characteristics

- ▶ Free-flowing
- ▶ High final strength – Resistant to high mechanical stresses
- ▶ Grindable and paintable after curing
- ▶ Foaming/gap bridging – Compensates minor unevenness

Fields of application

- ▶ Bonding sandwich/composite boards, e.g. for partition walls, door parts, exterior walls for prefabricated houses, façade elements, vehicle superstructural parts etc.
- ▶ Bonding of large-surface elements, e.g. for prefabricated houses, caravan and container construction
- ▶ Bonding garden furniture and window edges

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ According to the requirements of DIN EN 204-D4 to weathering resistant bondings of wood and derived wood products
- ▶ According to the requirements of DIN EN 14257 (WATT 91) to temperature-resistant bondings of wood and derived wood products
- ▶ Conform to LEED® v3 IEQ-credits 4.1 adhesives and sealants
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

Acrylic adhesives

A 265

OTTOCOLL® A 265 TopFix

SPECIAL

The fixing adhesive

1-component acrylic adhesive
For indoor application

Characteristics

- › High initial adhesion – No fixation required
- › Fast curing – Short pressing and fixing times
- › Compatible with natural stone – Does not cause greasy deposits on natural stones
- › Grindable and paintable after curing
- › Solvent-free
- › Store and transport frost-free

Fields of application

- › Bonding of stucco and ceiling profiles
- › Bonding of gypsum plasterboards
- › Bonding of cable ducts made of PVC
- › Bonding of stone, natural stone and ceramic
- › Bonding of insulating units, e. g. made of polystyrene, PVC, PU etc.
- › Bonding of window sills, floor strips, decorative strips and stairs
- › Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- › Tested fire behaviour in accordance with EN 13501: class E
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+
- › Suitable for applications according to IVD instruction sheet no. 30+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	20 l hobbock

OTTOCOLL® A 270 SPECIAL

The film adhesive

1-component dispersion adhesive
For indoor application

Characteristics

- ▶ Durable adhesive properties – Removable/correctable
- ▶ Highly adhesive – No fixation required
- ▶ Can be processed at temperatures down to -10°C
- ▶ Solvent-free
- ▶ Low odour – No odour nuisance
- ▶ Ageing resistant – For long-lasting indoor applications
- ▶ Frost-resistant – Can be stored and transported in temperatures as low as -10°C for up to 48 hours

Fields of application

- ▶ For connecting air-tight strips according to DIN 4108 – 7 without pressure slats or profiles
- ▶ Not suitable for sauna and swimming pools

Standards and tests

- ▶ According to the requirements of DIN 4108 – 11
- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 12+19-2+31+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge	580 ml aluminium foil bag
 fair blue	A270-04-C987	A270-08-C987
Packaging unit	20	20
Pieces per pallet	1200	600

Additional useful information

For forming airtight bonds of vapour retarders and vapour barriers on absorbent substrates, such as plastering, concrete or untreated wood.

Wet method:

1. Fix vapour barrier in place with adhesive tape. Remove the fixed vapour barrier immediately after applying OTTOCOLL® A 270 in 8 mm beads.

2. Apply vapour barrier with loop in order to compensate movements of the building.

3. **Press** vapour barrier **lightly** onto the bead. **CAUTION:** Please do not press it flat – OTTOCOLL® A 270 bead must be at least 4 mm thick.

Silicone adhesives

OTTOCOLL® S 16

SPECIAL

The mirror adhesive

1-component silicone adhesive based on alkoxy, neutral cross-linking
For indoor and outdoor application

Characteristics

- ▶ Mirror-compatible – Suitable for all commercially available mirrors
- ▶ Very good adhesion on many materials – Can be used on many materials without pretreatment
- ▶ Elastic – Compensates movements

Fields of application

- ▶ Bonding of mirrors on ceramic, glass, plastic, stainless steel, aluminium, wood, concrete, etc.
- ▶ Bonding of lacquered and enamelled glass

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

Packaging	310 ml cartridge
 mint white	S16-04-C97
Packaging unit	20
Pieces per pallet	1200

Additional useful information

For elastic bonding of mirrors on ceramics, glass, plastic, stainless steel, aluminium, wood, concrete, plaster, masonry, gypsum board, aerated concrete or untreated wood. Commercially available mirror coatings do not need to be primed. OTTO Primer 1105 must be applied thickly on mineral surfaces. Airing-out takes at least 30 minutes. Coated chipboard must be pretreated with OTTO Primer 1216. When bonding onto substrates not mentioned here, please consult our Applications Technology department.

Never apply OTTOCOLL® S 16 in dots or over the whole surface but always in vertical stripes (beads). At least three adhesive stripes each approx. 10 mm wide have to be applied per square metre of mirror in order to enable the air circulation required for vulcanisation. The minimum distance between the mirror and substrate must be 1.6 mm, which can be realised by applying spacers. Preliminary fixation until curing (at least 48 hours) can be carried out with adhesive strips, blocks of wood or wedges.

For sealing the outside edges of the mirror in combination with natural stones we advise OTTOSEAL® S 70, S 80, S 130 and S 140, in combination with other materials like ceramics, metal, glass etc. we advise OTTOSEAL® S 120 and S 125.

Please note that sealing must only be performed following the complete curing of the OTTOCOLL® S 16 mirror adhesive and once the decomposition products have completely escaped. This takes about seven days. Mirrors without glass backs should only be sealed at the vertical edges to avoid damage to the mirror coating caused by the formation of condensed water.

For an ideal adhesion or load capacity an undercoat of minimum 10 cm² per kg weight of pane, applied in strings, is necessary.

S 495

OTTOCOLL® S 495

SPECIAL

The panel adhesive

1-component silicone adhesive based on alkoxy, neutral cross-linking
For indoor and outdoor application

Characteristics

- ▶ Very good adhesion on many substrates – Suitable for all commercially available panels
- ▶ Flame retardant – building material class B1 according to DIN 4102 – Can be used under increased fire protection requirements
- ▶ Efficient wall panel mounting – Bonding of large wall surfaces in a short time
- ▶ Compatible with acrylic glass and polycarbonate – Does not cause stress cracks
- ▶ Elastic – Compensates movements
- ▶ Low odour – No odour nuisance
- ▶ Solvent-free – Room can be used immediately

Fields of application

- ▶ Bonding of wall cladding panels indoors, such as in sanitary, kitchen and catering areas and in cold storage rooms
- ▶ Bonding in rooms with increased fire protection requirements, such as in escape routes
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Tested according to DIN 4102-B1 – hardly inflammable
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+
- ▶ Declaration in "baubook" Austria
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

**Fields of application**

- ▶ Bonding glass in bad weather and UV exposure
- ▶ Bonding of mirrors on ceramic, glass, plastic, stainless steel, aluminium, wood, concrete, etc.
- ▶ Bonding of lacquered and enamelled glass
- ▶ Bonding and mounting different materials, such as wood, wooden materials, plastics, metals and mineral substrates

Standards and tests

- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ French VOC-emission class A+
- ▶ Suitable for applications according to IVD instruction sheet no. 30+31+35 (IVD = German industry association sealants)

Glass, window and façade adhesives

OTTOCOLL® P 86 SPECIAL

The corner connection adhesive

1-component adhesive based on polyurethane
For indoor and outdoor application

Characteristics

- ▶ Excellent adhesion on metals
- ▶ Foaming – Fills cavities
- ▶ Long skin-formation – Long processing time
- ▶ Tensile strength after 7 days – approx. 14.000N (ift-test certificate)
- ▶ Only for commercial users. Please observe the material safety data sheet.

Fields of application

- ▶ General bonding in metal construction
- ▶ Weathering resistant bonding of corner joints on metal windows, doors and façades as well as conservatories

Standards and tests

- ▶ Tensile strength tested by the ift Rosenheim, Germany (institute for window techniques)
- ▶ According to the requirements of DIN EN 204-D4 to weathering resistant bondings of wood and derived wood products
- ▶ According to the requirements of DIN EN 14257 (WATT 91) to temperature-resistant bondings of wood and derived wood products
- ▶ Expertise about the use of OTTOCOLL® P 86 translucent for bonding modified wood (Georg-August-University Göttingen, Germany)
- ▶ Conform to LEED® v3 IEQ-credits 4.1 adhesives and sealants
- ▶ French VOC-emission class A+
- ▶ Meets the requirements for fire behavior according to EN 13501: Class E
- ▶ Suitable for applications according to IVD instruction sheet no. 30+35 (IVD = German industry association sealants)

Packaging	310ml cartridge	580ml aluminium foil bag
translucent	P86-04-C95	P86-08-C95
white	P86-04-C01	P86-08-C01
Packaging unit	20	20
Pieces per pallet	1200	600

Additional useful information

For bonding metals, the adhesive must not only have very fast curing but also excellent adhesive power on the metals used. OTTOCOLL® P 86 being an adhesive based on PU is immediately ready to use and easy to handle.

Curing takes place via the chemical reaction with moisture, which is effected by spraying the surfaces to be bonded. Since small quantities of carbon dioxide are formed while curing, OTTOCOLL® P 86 increases slightly in volume enabling hollow spaces to be filled up creating a tight anchoring of angle brackets and aluminium profiles.

The high bonding strength of corner joints of OTTOCOLL® P 86 is confirmed by a test certificate issued by the Institute for Window Technology, Rosenheim, Germany (ift Rosenheim).

Processing of OTTOCOLL® P 86

When using 1-component PU adhesives, a damp surface of the joint partner can support the thorough hardening. Lightly spray the parts to be bonded with water, apply OTTOCOLL® P 86 and join within the skin-forming time of approx. 20 minutes. The materials to be bonded must be affixed before the adhesive has hardened. The bonded parts can be used after about 2 hours.

P520

OTTOCOLL® P520

★★★★★
PREMIUM

The premium corner connection adhesive

2-component adhesive based on polyurethane
For indoor and outdoor application

Characteristics

- ▶ Available in six processing times from 1 to 45 minutes
- ▶ Fast curing even in thick layers – Fast further processing
- ▶ Reliable curing in a defined period of time – Predictable handling and functional strength
- ▶ Non-shrink curing – No volume shrinkage
- ▶ Tensile strength after 7 days – approx. 14.000N (ift-test certificate)

Fields of application

- ▶ Weathering resistant bonding of corner joints on metal windows, doors and façades as well as conservatories

- ▶ General bonding in metal construction
- ▶ Also suitable for firm bonding of very different materials such as wood, metal, plastics, stone etc.

Standards and tests

- ▶ Tensile strength tested by the ift Rosenheim, Germany (institute for window techniques)
- ▶ According to the requirements of DIN EN 204-D4 to weathering resistant bondings of wood and derived wood products
- ▶ According to the requirements of DIN EN 14257 (WATT 91) to temperature-resistant bondings of wood and derived wood products
- ▶ Conform to LEED® v3 IEQ-credits 4.1 adhesives and sealants
- ▶ French VOC-emission class A+
- ▶ Meets the requirements for fire behavior according to EN 13501: Class E

Additional useful information

In order to meet the requirements for a permanent joint of frame profiles and corner brackets, the adhesive must not only cure very quickly, but above all show excellent adhesive power on the metals used.

The high bonding strength of corner joints of OTTOCOLL® P520 is confirmed by a test certificate issued by the Institute for Window Technology Rosenheim, Germany (ift Rosenheim). The corner connection resisted an applied load of 1,400kg after only 24h curing time.

The static mixer fitted onto the twin cartridge makes OTTOCOLL® P520 is not only easy to use but also ensures the right mixing ratio and a very homogeneous blend.

Since OTTOCOLL® P520 once cured is not brittle, but remains permanently viscoplastic, the bonding shows outstanding knock and shock resistance.

Processing of OTTOCOLL® P520 secure – fast – multi-variant

OTTOCOLL® P520 in the easy-to-process double cartridge together with the static mixer completely rules out mixing errors and cures even in very thick layers.

OTTOFLEX® system compound sealing

OTTOFLEX® Protective coating

The ready-to-use composite sealing

For indoor application

Characteristics

- ▶ Sealing against humidity
- ▶ Compatible with commercially available tile adhesives and solvent-free coatings
- ▶ Compatible with OTTO silicone sealants
- ▶ Ready-to-use, easily applicable by rolling, painting or trowelling
- ▶ Very short drying time of 2 to 3 hours
- ▶ High crack bridging properties
- ▶ Free of plasticisers and solvents
- ▶ Store and transport frost-free
- ▶ Complies with building material class B2 "normally inflammable" in accordance with DIN 4102-1

Fields of application

- ▶ Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method
- ▶ Suitable for very various substrates, e.g. gypsum, gypsum plasterboards, gypsum fibre, (cellular-) concrete, masonry, stone, screed

Standards and tests

- ▶ Complies with the water action categories W0-I, W1-I and W2-I for tear class R1-I in accordance with DIN 18534
- ▶ General building inspection certificate – Liquid seal in combination with tiles and board coverings for use as building sealant
- ▶ Conform to the moisture resistance classes A0 according to ZDB and A according to abP
- ▶ Based on the inspections for awarding an abP in accordance with PG-AIV-F and the resulting areas of application, the following stress categories can be assigned from the ÖNORM B 3407 – W1, W2, W3 and W4
- ▶ GISCODE BSW10
- ▶ French VOC-emission class A
- ▶ EMICODE® EC 1 PLUS – very low emission

Packaging	7 kg plastic pail ¹	12 kg plastic pail ¹	20 kg plastic pail ¹	90 kg plastic drum ²

- ¹ Gebinde mit beige packter Farbpaste für den zweiten Auftrag.
- ² Für das 90 kg Fass müssen die benötigten Farbbeutel nach Bedarf separat bestellt werden. Wir empfehlen zur Einfärbung von 20 kg Flüssigfolie 1 Beutel Farbpaste (10g) d. h. für 90 kg ca. 5 Beutel.

Additional useful information

DIN 18534-1 stipulates the application of at least two layers of fluid sealant (AIV-F) which must entirely cover the surface and be in two contrasting colours.

OTTOFLEX® Protective Coating offers an innovative solution to this: A colour paste is provided with each container. Empty the contents of the sachet into the remaining liquid coating, mix well and apply as usual.

Advantages of the colour additive:

- ▶ Fewer containers required
- ▶ No risk of confusion during transport or on the building site

The tile adhesives tested in the system can be found on our website:

OTTO product tip

OTTOFLEX® Primer

p. 103

OFAB

OTTOFLEX® Sealing strip

The time-saving composite sealing

Polyethylene sealing strip with double non-woven fabric

Characteristics

- ▶ Impermeable to water and has water vapour retarding properties
- ▶ High practical stretching and crack bridging properties
- ▶ Resistant to ageing and decomposition
- ▶ Good resistance to aqueous solutions of salt, acids and alkaline solutions
- ▶ The product is alkali-resistant according to the test specifications of abP Sealing in connection with tiles and slabs and of ETAG 022
- ▶ Complies with building material class B2 "normally inflammable" in accordance with DIN 4102-1

Fields of application

- ▶ Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method (e. g. wet areas such as bathrooms, shower rooms, edge areas of swimming pools, saunas, steam baths, steam saunas, as well as for industrial uses in the foodstuffs industry, e. g. in breweries, dairies)
- ▶ Flexible composite sealing under ceramic coverings and natural stone on balconies, terraces and arcades (not above used rooms) with a gradient $\geq 1.5\%$

- ▶ OTTOFLEX® Sealing strip is a crack-bridging, uncoupling, watertight, alternative sealing strip with non-woven fabric for safe fastening of the tile adhesive applied

Standards and tests

- ▶ Complies with the water action categories W0-I, W1-I, W2-I and W3-I for tear class R1-I in accordance with DIN 18534
- ▶ According to the moisture resistance classes A and C according to abP as well as A0 and B0 according to ZDB information sheet
- ▶ General building inspection certificate – Panel-shaped seal in combination with tiles and board coverings for use as building sealant
- ▶ Based on the inspections for awarding an abP in accordance with PG-AIV-F and the resulting areas of application, the following stress categories can be assigned from the ÖNORM B 3407 – W1, W2, W3, W4, W5 and W6
- ▶ French VOC-emission class A+
- ▶ EMICODE® EC 1 PLUS – very low emission

OTTO product tip

OTTOCOLL® M 500

p. 71

OTTOFLEX® Slurry seal coating

The heavy-duty composite sealing

- › Suitable for substrates which are sufficiently stable such as gypsum plasterboard, gypsum fibre, screed, heated screed, concrete, masonry, cellular concrete and plasters classified by mortar groups II and III
- › In very wet areas conform to stress categories A and B according to abP

Standards and tests

- › General building inspection certificate – Liquid seal in combination with tiles and board coverings for use as building sealant
- › Complies with the water action categories W0-I, W1-I, W2-I and W3-I for tear class R1-I in accordance with DIN 18534
- › Complies with the water action category W1-B for the tear classes R0-B and R1-B for the container sites S1-B and S2-B in accordance with DIN 18535
- › Conform to the stress categories A and B according to abP
- › Conform to the moisture resistance classes A0 and B0 according to ZDB information sheet
- › Based on the inspections for awarding an abP in accordance with PG-AIV-F and the resulting areas of application, the following stress categories can be assigned from the ÖNORM B 3407 – W1, W2, W3, W4, W5 (except areas with increased chemical stress) and W6
- › Watertightness tested in accordance with DIN EN 14891, table 1
- › GISCODE ZP1
- › French VOC-emission class A+

Highly polymer-modified cementitious coating

Characteristics

- › 1-component, flexible composite sealing – quick-curing
- › Crack-bridging
- › Easy to use
- › Crack-free curing
- › Watertight and permeable to vapour diffusion after curing
- › Frost and ageing resistant after setting
- › Complies with building material class B2 “normally inflammable” in accordance with DIN 4102-1

Fields of application

- › For application in interior and exterior areas
- › Flexible composite sealing under ceramic coverings and natural stone in moisture-prone rooms and wet rooms
- › Flexible composite sealing under ceramic coverings and natural stone on balconies, terraces and arcades (not above used rooms) with a gradient $\geq 1.5\%$
- › Construction waterproofing of components which have contact with the earth to protect against ground moisture and non-oppressive water, such as exterior cellar walls and supporting walls
- › For sealing swimming pools and solid water containers for the interior and the exterior, authorised for a water depth of up to 4 m

Packaging	20 kg sack
	OFDS-108
Packaging unit	1
Pieces per pallet	50

OFAEB

OTTOFLEX® Sealing and decoupling strip

SPECIAL

The decoupling composite sealing

- › Flexible composite sealing under ceramic coverings and natural stone on balconies, terraces and arcades (not above used rooms) with a gradient $\geq 1.5\%$

Standards and tests

- › Complies with the water action categories W0-I, W1-I, W2-I and W3-I for tear class R1-I in accordance with DIN 18534
- › According to the moisture resistance classes A and C according to abP as well as A0 and B0 according to ZDB information sheet
- › General building inspection certificate – Panel-shaped seal in combination with tiles and board coverings for use as building sealant
- › Based on the inspections for awarding an abP in accordance with PG-AIV-F and the resulting areas of application, the following stress categories can be assigned from the ÖNORM B 3407 – W1, W2, W3, W4, W5 and W6
- › EMICODE® EC 1 PLUS – very low emission
- › French VOC-emission class A+

Dimensions (length x width)	Order unit (OU)	Pieces per pallet	Order code
15 x 1 m	1 piece	270	OFAEB-100

Special elastomer tape fully fabric reinforced on both sides

For indoor and outdoor application

Characteristics

- › Optimal for critical substrates
- › Very high stretching and crack bridging properties
- › Fast further processing
- › Ageing resistant
- › Sealing strip with high decoupling effect
- › Impermeable to water and has water vapour retarding properties
- › The product is alkali-resistant according to the test specifications of abP Sealing in connection with tiles and slabs and of ETAG 022
- › Complies with building material class B2 "normally inflammable" in accordance with DIN 4102-1

Fields of application

- › For decoupling, crack bridging and waterproof composite sealing in the floor area
- › Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method (e.g. wet areas such as bathrooms, shower rooms, edge areas of swimming pools, saunas, steam baths, steam saunas, as well as for industrial uses in the foodstuffs industry, e.g. in breweries, dairies)

OTTO product tip

OTTOFLEX® Protective coating

p. 99

Characteristics

- › Synthetic resin dispersion based on styrene butadiene
- › Solvent-free
- › In combination with OTTOFLEX® Protective Coating it complies with the requirements of the moisture resistance classes A0 according to ZDB-information sheet as well as A according to abP
- › Store and transport frost-free

Fields of application

- › Primer for OTTOFLEX® Protective coating, on absorbent and heavily absorbent substrates such as gypsum plasterboards, gypsum plaster components, plaster, concrete, cellular concrete, masonry, stone, screed, chipboard of fibreboard

OFTG

OTTOFLEX® Deep primer

Standards and tests

- › Complies with the stress categories W1 and W2 in accordance with ÖNORM B 3407
- › GISCODE BSW20
- › EMICODE® EC 1 PLUS – very low emission
- › French VOC-emission class A+

Packaging	1 kg plastic bottle	5 kg plastic canister	10 kg plastic canister	20 kg plastic canister
fair blue	OFTG-39	OFTG-59	OFTG-61	OFTG-68
Packaging unit	10	1	1	1
Pieces per pallet	360	90	60	24
Packaging				200kg plastic drum
fair blue				on request
Packaging unit				1
Pieces per pallet				2

Characteristics

- › Solvent-free primer for floors and walls
- › Impregnates deeply into the surface
- › Forms a very good bonding agent for subsequent coatings
- › Improves the adhesion of plasters, tile adhesives and wallpapers
- › Dilutable 1:2 with water
- › Store and transport frost-free

Fields of application

- › Priming and reinforcing of absorbent and less absorbent surfaces
- › Primer should be applied prior to the application of acrylate coatings and commercially available solvent-free tile adhesives on gypsum boards, gypsum and lime-gypsum plasterings, gypsum floors, gypsum fibreboards, concrete, cellular concrete, sand-lime brick, bricks, masonry, plasters, screeds, anhydrite floors and melted asphalt screeds, panelling, priming and self-spreading floor leveling compounds
- › Use within the scope of tile setting according to DIN 18157-1
- › Facilitates the removal of wallpapers during renovating work
- › Improves the load-bearing strength and firmness of the substrate

OTTOFLEX® Adhesive primer

Standards and tests

- › GISCODE BSW10
- › EMICODE® EC 1 PLUS – very low emission
- › French VOC-emission class A+

Packaging	1 kg plastic bottle	6 kg plastic pail
	OFHG-48	OFHG-45
Packaging unit	10	1
Pieces per pallet	480	45

Characteristics

- › Adhesion-enhancing primer for floor and walls
- › High-strength bond adhesion even on sealed, smooth substrates such as glazed ceramic tiles
- › Very short, 1-hour drying time on non-absorptive substrates; no drying time on absorptive substrates
- › Compatible with commercially available tile adhesives and solvent-free coatings
- › Solvent-free
- › Store and transport frost-free

Fields of application

- › Primer and bonding course on absorptive and non-absorptive floor and wall areas indoors and outdoors before laying ceramic coverings
- › Suitable for a large variety of substrate, for example hydraulically hardening cement, lime and gypsum plasters, gypsum plaster boards, gypsum fibreboards, brickwork, aerated concrete, lime-sand brick, cement, anhydrite, magnesia and mastic asphalt screeds, timber floorboards, self-levelling floor-levelling compound/material, natural stone, glazed ceramic tiles, steel and glass
- › Creates a secure bond with the following coatings and water-based thin-bed mortars

OFIE

OTTOFLEX® Interior corner tapes

The pre-shaped interior corner tape

Standards and tests

- ▶ Complies with the water action categories W0-I, W1-I, W2-I and W3-I for tear class R1-I in accordance with DIN 18534
- ▶ Complies with the water action category W1-B for the tear classes R0-B and R1-B for the container sites S1-B and S2-B in accordance with DIN 18535
- ▶ According to the moisture resistance classes A0 and B0 according to ZDB as well as A, B and C according to abP
- ▶ Complies with the stress categories W1, W2, W3, W4, W5 and W6 in accordance with ÖNORM B 3407
- ▶ French VOC-emission class A+

Shower board corner fully fabric reinforced on both sides with special elastomer sealing layer
For indoor and outdoor application

Characteristics

- › Secure connection with OTTOFLEX® protective coating/slurry seal coating/ sealing strip/sealing and decoupling strip
- › Polyethylene film with polypropylene fleece on both sides
- › Preformed for optimal sealing of offset levels/ offset levels in floor-level showers
- › Extremely elastic and tear resistant
- › Ageing resistant

Fields of application

- › Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method
- › Sealing between the shower trays and floor-level shower trays in the transition area of the wall and floor, as well as floor offset of the shower board area

OTTOFLEX® Bath edge corner

The practical bath edge corner

Standards and tests

- › Complies with the water action categories W0-I, W1-I and W2-I in accordance with DIN 18534
- › According to the moisture resistance classes according to ZDB and abP
- › Complies with the stress categories W1, W2, W3 and W4 in accordance with ÖNORM B 3407
- › EMICODE® EC 1 PLUS – very low emission

Bath edge corner fully fabric reinforced on both sides with special elastomer sealing layer
For indoor application

Characteristics

- › Secure connection with OTTOFLEX® protective coating/slurry seal coating/sealing strip/sealing and decoupling strip
- › Polyethylene film with polypropylene fleece on both sides and self-adhesive strips of butyl rubber
- › Secure sealing in the corner area of the bath tub
- › Self-adhesive strips on one side for easy workability
- › Perfect match for OTTOFLEX® bath edge sealing tape
- › Extremely elastic and tear resistant
- › Ageing resistant

Fields of application

- › Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method
- › Sealing of inner corners between the shower tray and bathtub and the wall

OFMFE

OTTOFLEX® Multifunctional corner

SPECIAL

The universal multifunctional corner

Standards and tests

- › Complies with the water action categories W0-I,W1-I and W2-I in accordance with DIN 18534
- › According to the moisture resistance classes according to ZDB and abP
- › Complies with the stress categories W1, W2, W3 and W4 in accordance with ÖNORM B 3407
- › EMICODE® EC 1 PLUS – very low emission
- › French VOC-emission class A+

Dimensions (length x height)	Order unit (OU)	Packaging unit (PU)	Packaging	Order code
24,7 x 2,5 cm	1 piece	3 pieces	box	OFMFE

Multifunctional corner fully fabric reinforced on both sides with special elastomer sealing layer
For indoor application

Characteristics

- › Secure connection with OTTOFLEX® protective coating/slurry seal coating/ sealing strip/sealing and decoupling strip
- › Polyethylene film with polypropylene fleece on both sides and self-adhesive strips of butyl rubber
- › Optimal for special installation situations with floor-level shower trays
- › Self-adhesive strips on one side for easy workability
- › Perfect match for OTTOFLEX® bath edge sealing tape
- › Extremely elastic and tear resistant

Fields of application

- › Composite sealing in moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone using the thin bed method
- › Sealing between the shower trays and floor-level shower trays in the transition area of the wall and floor, as well as floor offset of the shower board area

OTTOFLEX® Sealing tape

★★★★★
PREMIUM

The premium sealing tape for perfect application

Standards and tests

- › Tested in accordance with the test principles to issue a general appraisal certificate (abP) P-AB 075-03 for liquid processable sealings in association with tile and paving tiles, paragraph 3.5.6 (edition september 2004) – to apply water pressure of 3bar over a period of 7 days
- › Complies with the water action categories W0-I, W1-I, W2-I and W3-I for tear class R1-I in accordance with DIN 18534
- › Complies with the water action category W1-B for the tear classes R0-B and R1-B for the container sites S1-B and S2-B in accordance with DIN 18535
- › According to the moisture resistance classes A0 and B0 according to ZDB as well as A, B and C according to abP
- › Complies with the stress categories W1, W2, W3, W4, W5 and W6 in accordance with ÖNORM B 3407
- › French VOC-emission class A+
- › EMICODE® EC 1 PLUS – very low emission

Polypropylene fleece with butyl rubber
For indoor application

Characteristics

- › Flexible sealing tape
- › Integrated, self-adhesive butyl strips for easy application using release foil
- › Compatible with OTTO silicone sealants
- › Safe connection with OTTOFLEX® Protective coating/Slurry seal coating/Sealing strip
- › Secure sealing at the edge of the bath
- › Extremely elastic and tear resistant

Fields of application

- › Sealing tape for the flexible seal between the shower/bath tub and the wall
- › Composite sealing for moisture-prone rooms and wet rooms underneath ceramic coverings and natural stone

OFSCHUTZ

OTTOFLEX® Protective tape

The cut-resistant protective tape

One-sided self-adhesive tape with polyamide fabric

For indoor and outdoor application

Characteristics

- ▶ Self-adhesive protective tape, tight-edged woven with double fabric with cut-resistant effect
- ▶ Protection of the compound seal (e.g. OTTOFLEX® sealing tape) against inadvertent separation in a sanitation case
- ▶ Textile made from polyamide and high molecular weight polyethylene with self-adhesive strip and peel-off foil
- ▶ Thin overall thickness to ensure it doesn't come across as too thick underneath the tile
- ▶ Flexible for easy processing
- ▶ Ageing resistant

Fields of application

- ▶ Self-adhesive protective tape as a supplement for sealing tapes for use in the areas of silicone joints
- ▶ All joint areas which need to be cut-proof. Wall joint, floor joint, bath and shower edge

Standards and tests

- ▶ Cut resistance passed according to EN 388
- ▶ UV-resistance according to DIN EN ISO 4892-2 at least 200 hours

Width	Order unit (OU)	Order code

5 cm	1 roll, each 25 m	OFSCHUTZ25

OTTOFLEX® Sound insulation tape

The sound insulation tape

Width	Order unit (OU)	Order code
3 cm	1 roll, each 4 m	OFSCHALL4
3 cm	1 roll, each 25 m	OFSCHALL25

One-sided self-adhesive PE foam tape
For indoor application

Characteristics

- › Self-adhesive for easy application
- › Ageing resistant

Fields of application

- › For sound insulation between the edge of the shower/bath tub and the wall
- › Sound insulation in the sanitary sector

OTTOPUR PU foams

OTTOPUR OP910

The dosing foam with very good sound and heat insulation

1-component PU dosing foam
For indoor and outdoor application

Characteristics

- › Very good sound and heat insulation
- › 60dB sound insulation according to EN ISO 717-1
- › 0.035 W/mK insulation value according to DIN 52612
- › Foam yield approx. 45l per 750ml can
- › Can be cut after approx. 30 minutes
- › Can be loaded after approx. 3-5 hours

Fields of application

- › Mounting and insulation of window and door frames made of wood, steel or plastic in masonry
- › Mounting and insulating of interior partition walls, window sills, etc.
- › Filling of cavities of all types
- › Joining of well and shaft rings in sewer manholes and domestic sewage treatment plants
- › For the bonding of polystyrene rigid foam panels as perimeter insulation according to DIN 4108-2

Standards and tests

- › General building inspection certificate: normal inflammable building material (class E according to DIN EN 13501-1)
- › EMICODE® EC 1^{PLUS} – very low emission
- › French VOC-emission class A+

Packaging	750 ml aerosol can

OTTOPUR OP915

The dosing foam with very good sound and heat insulation

1-component PU dosing foam
For indoor and outdoor application

Characteristics

- ▶ Very good sound and heat insulation
- ▶ 60dB sound insulation according to EN ISO 717-1
- ▶ 0.038 W/mK insulation value according to DIN 52612
- ▶ Foam yield approx. 36l per 500ml can
- ▶ Can be cut after approx. 35 minutes
- ▶ Can be fully loaded after approx. 24 hours

Fields of application

- ▶ Mounting and insulation of window and door frames made of wood, steel or plastic in masonry
- ▶ Mounting and insulating of interior partition walls, window sills, etc.
- ▶ Filling of cavities of all types
- ▶ Especially suitable for narrow sealings, e.g. restoration of old buildings
- ▶ Joining of well and shaft rings in sewer manholes and domestic sewage treatment plants
- ▶ For the bonding of polystyrene rigid foam panels as perimeter insulation according to DIN 4108-2

Standards and tests

- ▶ General building inspection certificate – normal inflammable building material (B2) according to DIN 4102-1
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+

Packaging	500 ml aerosol can

OTTOPUR OP920

The 2-component foam with very fast curing

2-component PU adapter foam
For indoor and outdoor application

Characteristics

- › Can be cut after approx. 9 minutes
- › Braces can be removed after approx. 30 minutes
- › Can be fully loaded after approx. 3 hours
- › Foam capacity: up to 12 litres per 400ml can
- › 60dB sound insulation according to EN ISO 717-1
- › 0.026 W/mK insulation value according to DIN 52612

Fields of application

- › Mounting and insulating of door and window frames made of wood, steel and plastic in masonry
- › Suitable for the mounting of wooden stairs
- › Suitable for mounting basins made of acrylic and steel (shower trays)
- › Joining of well and shaft rings in sewer manholes and domestic sewage treatment plants
- › For the bonding of polystyrene rigid foam panels as perimeter insulation according to DIN 4108-2

Standards and tests

- › General building inspection certificate – normal inflammable building material (B2) according to DIN 4102-1

SPECIAL

The flexible foam

1-component PU dosing foam
For indoor and outdoor application

Characteristics

- › Permanent absorption of component movements
- › Can be processed at temperatures down to -10 °C
- › 63 dB sound insulation according to EN ISO 717-1
- › 0.035 W/mK insulation value according to DIN 52612
- › Foam yield approx. 44l per 750 ml can
- › Can be cut after approx. 35 minutes
- › Can be loaded after approx. 12 hours

Fields of application

- › Mounting and insulation of window and door frames made of wood, steel or plastic in masonry
- › Filling and insulation of joints and cavities for roof extensions and roof insulations
- › Foaming of small wall recesses, all types of cable passages and other cavities

Standards and tests

- › General building inspection certificate – normal inflammable building material (B2) according to DIN 4102-1
- › EMICODE® EC 1 PLUS – very low emission
- › French VOC-emission class A+

SPECIAL

The B1 dosing foam

1-component PU dosing foam
For indoor and outdoor application

Characteristics

- ▶ B1 – flame-resistance in accordance with DIN 4102 Part 1
- ▶ Supports the smoke-tight installation of safety doors
- ▶ 60dB sound insulation according to EN ISO 717-1
- ▶ 0.036 W/mK insulation value according to DIN 52612
- ▶ Foam yield approx. 45l per 750 ml can
- ▶ Can be cut after approx. 50 minutes
- ▶ Can be loaded after approx. 12 hours

Fields of application

- ▶ Window installation (for clean and controlled backfilling and insulating sealing of joints for windows and shutter casings)
- ▶ Filling of joints for door frames but not for mere assembly purposes without additional, mechanical fastening
- ▶ Foaming of small wall recesses, all types of cable passages and other cavities

Standards and tests

- ▶ General building supervisory test certificate in accordance with DIN 4102-1 B1
- ▶ EMICODE® EC 1^{PLUS} – very low emission
- ▶ French VOC-emission class A+

Smoothing agents

OTTO Smoothing Agent

Characteristics

- ▶ Aqueous solution of surface-active substances
- ▶ Dermatologically tested ingredients
- ▶ Does not dry out the skin
- ▶ Dilutable with water; 2 (smoothing agent) : 1 (water)
- ▶ Keeps the shine of the sealant surface intact
- ▶ Colouring pigments of the sealant are not washed off
- ▶ Not suitable for marble and other natural stones

Fields of application

- ▶ Smoothing of sealant surfaces including silicone, polyurethane and MS hybrid polymer sealants

Standards and tests

- ▶ Due to the results of the in-vivo compatibility test (test report of Institute Fresenius, 65232 Taunusstein, Germany) the OTTO Smoothing Agent is classified as harmless in terms of a potential skin irritating effect

Packaging	250 ml plastic bottle	1,000 ml plastic bottle	5 l plastic canister
	GL-52	GL-57	GL-59
Packaging unit	1	1	1
Pieces per pallet	–	–	90
Packaging	10 l plastic canister	60 l plastic drum	200 l plastic drum with tap hole ¹
	GL-61	GL-65	on request
Packaging unit	1	1	1
Pieces per pallet	30	6	2

¹ OTTO Drain cock 2" with venting (AERO FLOW) available separately

Additional useful information

The OTTO Smoothing Agent may be diluted with water.

Smoothing agent must not remain on the sealant joint and on adjacent surfaces, because dried residual sealant might cause optical impairments (dull/light spots).

As a matter of principle it is advisable to use the smoothing agent as sparingly as possible, for example by only slightly moistening the smoothing tools or applying the smoothing agent to the surface of the sealant with a clean paintbrush.

Residual smoothing agent must be removed using clear water before it dries.

Before use, preliminary tests should be carried out to ensure the compatibility with adjacent surfaces, for example different types of coated wood.

The dermatologically tested ingredients of the OTTO Smoothing Agent have been rated as "non irritating to the skin" by the Fresenius Institute, Taunusstein, Germany and do not, unlike washing-up liquids, dry out the skin. Nevertheless, hands should be washed and creamed after use.

OTTO accessories

¹ OTTO Drain cock 2" with venting (AERO-FLOW)

p. 182

OTTO Concentrated smoothing agent

Characteristics

- ▶ Aqueous solution of surface-active substances
- ▶ Suspension – homogenise before use
- ▶ Gentle on the skin due to dermatologically tested active ingredients
- ▶ Does not dry out the skin
- ▶ Concentrated, can be diluted with water individually depending on the sealant and use
- ▶ Keeps the shine of the sealant surface intact
- ▶ Colouring pigments of the sealant are not washed off
- ▶ Not suitable for marble and other natural stones

Packaging	1,000 ml plastic bottle	5 l plastic canister
	GLK-57	GLK-59
Packaging unit	1	1
Pieces per pallet	–	90

Fields of application

- ▶ Smoothing of sealant surfaces including silicone, polyurethane and MS hybrid polymer sealants

OTTO Natural stone smoothing agent

Characteristics

- ▶ Aqueous solution of surface-active substances
- ▶ Especially attuned to delicate marble and natural stone varieties
- ▶ Reduces the risk of staining from smoothing agents to a minimum
- ▶ Dermatologically tested ingredients
- ▶ Does not dry out the skin
- ▶ Keeps the shine of the sealant surface intact
- ▶ Colouring pigments of the sealant are not washed off
- ▶ Use in undiluted condition only

Fields of application

- ▶ Smoothing of sealants in contact with natural stone

Standards and tests

- ▶ Due to the results of the in-vivo compatibility test (test report of Institute Fresenius, 65232 Taunusstein, Germany) the OTTO Smoothing Agent is classified as harmless in terms of a potential skin irritating effect

Packaging	250 ml plastic bottle	1,000 ml plastic bottle	5 l plastic canister
	GLN-52	GLN-57	GLN-59
Packaging unit	1	1	1
Pieces per pallet	–	–	90
Packaging	10 l plastic canister	60 l plastic drum	200 l plastic drum with tap hole ¹
	GLN-61	on request	on request
Packaging unit	1	1	1
Pieces per pallet	30	6	2

¹ OTTO Drain cock 2" with venting (AERO FLOW) available separately

Additional useful information

The OTTO Marble Silicone Smoothing Agent must always be used undiluted. The smoothing agent used should always be new and without impurities.

Smoothing agent must not remain on the sealant joint and on adjacent surfaces, because dried residual sealant might cause optical impairments (dull/light spots).

As a matter of principle it is advisable to use the smoothing agent as sparingly as possible, for example by only slightly moistening the smoothing tools or applying the smoothing agent to the surface of the sealant with a clean paintbrush.

Residual smoothing agent must be removed using clear water before it dries. Otherwise stains and discolouring can not be excluded completely due to the special consistency of natural stones.

When tooling off the matt finish with OTTO Marble Silicone Smoothing Agent – please be aware: The joint should be tooled off once, with a smoothing tool immersed in OTTO Marble Silicone Smoothing Agent. Do not make too many repeat passes with the smoothing tool to avoid polishing the matt surface!

Nevertheless, owing to the unique character of natural stone, stains/discolourations cannot be ruled out completely. Because of this and the many possible influences during processing and application, we advise carrying out preliminary, object-related tests.

The dermatologically tested ingredients of the OTTO Smoothing Agent have been rated as "non irritating to the skin" by the Fresenius Institute, Taunusstein, Germany and do not, unlike washing-up liquids, dry out the skin. Nevertheless, hands should be washed and creamed after use.

OTTO accessories

OTTO Smoothing agent spray

SPECIAL

Characteristics

- › Optimally tailored to hybrid sealants
- › Immediately ready for use
- › Refillable
- › Kind to the skin
- › Does not dry out the skin
- › Dermatologically tested ingredients
- › Colouring pigments of the sealant are not washed off
- › Not suitable for marble and other natural stones

Fields of application

- › Smoothing of OTTO sealants (hybrid, PU, silicone sealants)
- › Optimally tailored to hybrid sealants

Packaging	500 ml plastic spray bottle
Packaging unit	GLS-84
Pieces per pallet	12
	468

Accessory products

OTTO SilOut

The silicone remover

Thixotropic paste

For indoor and outdoor application

Characteristics

- ▶ For removing of cured silicone sealants and adhesives
- ▶ Removes silicone from wood, masonry, plastering, concrete, glass, porcelain, metal and plastics
- ▶ Compatible with a very wide variety of substrates in structural engineering and window construction as well as for sanitary areas
- ▶ Application leads to silicone-free surfaces

Fields of application

- ▶ Removing silicone residues from joints and soiled surfaces

Packaging	300 ml cartridge
○ white	SIEN-03-C01
Packaging unit	20
Pieces per pallet	1200

Additional useful information

Apply OTTO SilOut liberally to the surface to be treated. The layer should be approx. 2 or 3 times the thickness of the silicone sealant to be removed (at least 5 mm). The application time is around 5 hours for a silicone layer of 0.5 mm and around 24 hours for a silicone layer of 2 – 3 mm. The reaction speed depends mainly on the layer thickness of the silicone mass to be removed as well as on the type of the cross-linking system and the composition and the properties of the silicone sealant.

The solvated silicone compound and the residues of OTTO SilOut must be **removed completely** using a tool suitable for the substrate (e. g. spatula) and then a cloth moistened with water before re-jointing. If necessary, the treatment has to be repeated using OTTO SilOut. Before re-jointing, all OTTO SilOut left-overs in the joint and in the joint base must be carefully removed. Left-overs of OTTO SilOut can be particularly damaging to newly applied joint sealant on narrow or deep joints or rough bases (e. g. masonry, plaster, edge insulation strips, etc.).

Allow the joint edges and base enough time to dry out properly before re-jointing. OTTO Cleaner T is suitable for cleaning the joints and the surfaces to be joined before re-jointing.

STEX

OTTO StainEx

The natural stone degreasing paste

Special solvent-based paste
For indoor and outdoor application

Characteristics

- ▶ Ready-to-use paste
- ▶ Easy processing
- ▶ Successful usage may avoid expensive refurbishment of natural stone

Fields of application

- ▶ To remove grease from marble and natural stone where unsuitable sealants have caused migratory staining around the edges of the joints

Packaging	310 ml cartridge
 beige	STEX-20-C1378
Packaging unit	12
Pieces per pallet	1248

Additional useful information

OTTO StainEx eliminates migratory staining caused by unsuitable sealants and removes staining up to a depth of 2 cm. Please carry out a preliminary test to make sure that the grease stains can be removed with OTTO StainEx. Remove the sealant completely out of the joint. The edge joints should be dry when applying the paste. Don't use OTTO StainEx at base temperatures below +5 °C and above 20 °C. Put OTTO StainEx on the surface and spread it with a brush. Then apply OTTO StainEx again in order to achieve a layer thickness of at least 5 mm. After drying of the paste (at least 12 hours, paste has to be pulverised completely) sweep off the remaining solid parts with a broom or vacuum clean them. After cleaning no more dark stains should be visible. Remove remaining deeper stains by applying the paste a second or third time. Clean the joints afterwards and seal them with the natural stone silicone OTTOSEAL®.

OTTO Siloxan 290L

The silicone for surface impregnation

Oligomer siloxane in solvent
For outdoor application

Characteristics

- ▶ Ready-to-use silicone surface impregnation
- ▶ High penetration depth
- ▶ UV-resistant
- ▶ Can also be applied on moist substrates (not rain-wet)
- ▶ Forms a water- and dirt-repelling surface
- ▶ The hydrophobe effect prevents the penetration of moisture from the outside to the inside but it lets the internal moisture escape to the outside
- ▶ Bridges hair cracks up to a width of 0,3mm
- ▶ Reduces the tendency of treated surfaces to pick up dirt

- ▶ Avoids humidity in the construction material thus avoids salt efflorescence as well as moss and algae growth
- ▶ Paintable with commercial dispersion paints
- ▶ Low odour
- ▶ Colourless
- ▶ Slight deepening of colour is possible

Fields of application

- ▶ Hydrophobic treatment of façades and building components made of concrete, cellular concrete, fibre cement, brick-work, natural and artificial stone, mineralic plasters and coatings
- ▶ Drainage of moist and cracked surfaces, which are then painted using dispersion paints
- ▶ Only for vertical surfaces

Packaging	5l tin canister	10l tin canister	25l tin canister
colourless	SXN-58	SXN-60	SXN-62
Packaging unit	1	1	1
Pieces per pallet	82	50	24

Additional useful information

Hydrophobizing of façades results in greatly reduced water absorption, good UV-resistance and very good waterrepellent effect.

The ready-to-use solution can be applied directly by spraying or painting it on. The substrate should be fairly dry for this treatment.

Adjacent structural elements such as windows, doors, gutters etc. must be covered. Apply in two layers from top to bottom wet-on-wet. The hydrophobed façade is resistant to rain after approximately 24 hours.

The differences in water absorbency are significant:

	Water absorbency untreated	Water absorbency hydrophobed with OTTO Siloxan 290L
Concrete	3 %	0,8 %
Sandstone	5 %	0,2 %
Lime sandstone	13 %	0,8 %
Limestone	12 %	1,1 %
Clinker brick	3 %	0,1 %
Brick	18 %	0,1 %
Tufa	18 %	1,1 %
Mortar	7 %	1,2 %

Approx. average values depending on material quality

Primers/Cleaners

PR 1101

PR 1102

OTTO Cleanprimer 1101

The adhesion improver

Characteristics

- ▶ Ventilation time not required
- ▶ With UV-indicator (for the quality control/ inspection of the application via UV light)
- ▶ Cleanprimer to clean and improve the adhesion on coated and non-coated metallic substrates and various plastics (e.g. PVC)
- ▶ Free of toluol

OTTO Primer 1102

The sandstone primer

Characteristics

- ▶ Primer to improve adhesion of OTTOSEAL® S 70, S 80, S 117, S 130 and S 140 on sandstone
- ▶ Airing time at least 15 minutes (max. 3 hours)

OTTO Primer 1105

The universal primer for absorbent substrates

Characteristics

- ▶ Primer to improve adhesion on mineral and absorbent substrates (e.g. concrete, plaster, fibre cement etc.)
- ▶ Airing time at least 30 minutes (max. 3 hours)
- ▶ Highly film forming

Fields of application

- ▶ Barrier to alkaline surfaces
- ▶ Improves the adhesion of OTTO acrylic sealants on mineral materials (e.g. concrete, plaster, cellular concrete, fibre cement, gypsum), as well as on untreated wood and scumbles, on metallic substrates (e.g. anodic oxidation) and some plastics (e.g. PVC)
- ▶ Improves the adhesion properties of the 2-component PU foam OTTOPUR OP 920 on heavily absorbent and silted up substrates

PR 1215

OTTO Primer 1215

OTTO Primer 1216

The primer for natural stone and metal

OTTO Primer 1217

The silicone plastic primer

Characteristics

- ▶ Primer to improve the adhesion on natural stone, metallic materials and some plastics
- ▶ Ventilation time not required on smooth, non absorbent substrates
- ▶ Free of toluol

Fields of application

- ▶ Improves the adhesion of OTTO sealants on metallic materials (e. g. stainless steel, anodized aluminium, copper, galvanised steel and chrome) and coated metals (e. g. enamel, non-corrosive steel)
- ▶ Improves the adhesion of natural stone silicone S 70, S 80, S 117, S 130 and S 140 on marble and other natural stones, as well as on artificial stone and concrete block
- ▶ Improves the adhesion on some plastics (e. g. PVC) and on scumbles containing solvents

Characteristics

- ▶ Primer to improve the adhesion on many plastics
- ▶ No airing time for smooth and non-absorbent substrates; otherwise at least 15 minutes/max. 3 hours

OTTO Cleaner C

The profile-cleaner

Characteristics

- ▶ Cleaning of substrate before adhesion
- ▶ Very good cleaning and degreasing effect
- ▶ Dries quickly leaving no residue
- ▶ Ventilation time not required
- ▶ Compatible with conventional powder coatings

Fields of application

- ▶ Removing of dust, grease or oil films, residues of protection film, fresh PUR-foam and fresh sealant residues
- ▶ Removing of fresh PU- and Epoxi-residues on surfaces and working equipment
- ▶ Cleaning of aluminium profiles (plain, anodised aluminium or powder-coated)
- ▶ For the cleaning of many surfaces in plastic and metal processing areas

Packaging	1,000ml aluminium bottle
	REC-55
Packaging unit	5
Pieces per pallet	-

OTTO Cleaner F

The metal cleaner

Characteristics

- ▶ Cleaning metallic materials (plain or powder-coated) of non-cured OTTOCOLL® PU adhesive residues
- ▶ Very good cleaning and degreasing effect
- ▶ Dries quickly leaving no residue
- ▶ Ventilation time not required
- ▶ Pleasant odour
- ▶ Compatible with conventional powder coatings

Fields of application

- ▶ Removing grease or oil films on metallic substrates

REMP

OTTO Cleaner MP

The equipment cleaner

Characteristics

- ▶ Removing of non-cured OTTOCOLL® PU adhesive residues on equipment, dosing equipment, hoses, valves etc.
- ▶ Very good cleaning and degreasing effect
- ▶ Dries quickly leaving no residue
- ▶ Ventilation time not required

RET

OTTO Cleaner T

The standard cleaner

Characteristics

- ▶ Cleaning glass, metals and some plastics such as PVC and polyester
- ▶ Very good cleaning and degreasing effect
- ▶ Dries quickly leaving no residue
- ▶ Ventilation time not required

OTTO Spray primer

The contact adhesive for installing the window tape

Contact adhesive for the pre-treatment of wall reveal

For indoor and outdoor application

Characteristics

- › Spray primer or contact adhesive with high adhesive strength
- › Fast-drying
- › Universally usable

Fields of application

- › Pre-treatment of the wall reveal for the OTTO window tapes
- › Bonding of EPDM rails

OPCLEAN

OTTOPUR Cleaner

SPECIAL

The gun cleaner

Solvent-based cleaning spray
For indoor and outdoor application

Characteristics

- › Very strong cleaning effect
- › Fitting screw-on adapter for all commonly used applicator guns
- › Can be used as a spray can

Fields of application

- › Cleaning of used dosing guns
- › To remove unhardened PU-foam residues

Packaging	500 ml aerosol can
	OPCLEAN-83
Packaging unit	12

HPS-4T**OTTO Accumulator gun
Type HPS-4T****Characteristics**

- ▶ For aluminium foil bags up to 400ml and for 280/290/300/310ml cartridges
- ▶ Includes 2 Li-Ion batteries, 10.8 volts/1.5Ah
- ▶ Quick charger with state of charge indicator (charge time approx. 40 minutes)
- ▶ The return stop prevents the cartridge and bag from overflowing
- ▶ Including professional pressure disc, white, for the complete emptying of the cartridge
- ▶ Securely packaged in a durable transport case
- ▶ Conform to RoHS
- ▶ CE-compliant

2KAP400

OTTO Accumulator gun 2K AP 400

Characteristics

- ▶ Powerful accumulator gun for 2-component products
- ▶ Specifically for using 490ml side-by-side plastic cartridges with a mixing ratio of 10:1 in the MIXPACT™ C-, F- and BlueLine system or ACF system
- ▶ Includes 2 Li-Ion batteries, 18 volts/2.0Ah with state of charge indicator
- ▶ Quick charger with state of charge indicator (charge time approx. 30 minutes)
- ▶ Practical side loader in a lightweight skeleton design with exchangeable retaining bridges to securely hold the cartridge systems
- ▶ Exchangeable plunger for other mixing ratios (1:1, 2:1, 4:1 and 10:1)
- ▶ For easy transport in a practical carrying bag
- ▶ Conform to RoHS
- ▶ CE-compliant

Standards and tests

- ▶ Machinery Directive: 2006/42/EC
- ▶ EMV guideline: 2014/30/EU
- ▶ RoHS directive 2011/65/EU
- ▶ Applied standards for these guidelines can be found in the declaration of conformity at the end of the operating instructions

OTTO Compressed air gun P 600 B-2

Characteristics

- ▶ Compressed air gun with optimum centre of gravity
- ▶ Aluminium tube with fast-release fastener for up to 600ml aluminium foil bag
- ▶ Not suitable for cartridge use
- ▶ Continuously adjustable pressure regulation valve with plug nipple (EU)
- ▶ Maximum working pressure: 5 bar

OTTO Compressed air gun P 2x310

Characteristics

- ▶ Compressed air gun for the use of twin cartridges 2x 190ml and 2x 310ml with a mixture ratio of 1:1
- ▶ Infinitely adjustable pressure regulation in handle
- ▶ EU plug connection (fast-action coupling)
- ▶ One-hand operation, thus it is possible to regulate the dosing speed even during operation

OTTO Skeleton gun

Characteristics

- › Stable skeleton gun for 280/290/300/310 ml cartridges
- › With hardened driving rod and ladder hook
- › For medium to low-viscose acrylates, hybrids, polyurethanes and silicones
- › Permanent overrun and end stop
- › With tip cleaner in the handle
- › Transmission ratio 7:1
- › No spare part service

OTTO Hand-operated gun H 17

Characteristics

- › Economical hand-operated gun with rotating shell for 280/290/300/310 ml cartridges
- › Thrust and drive parts with special alloy, corrosion-resistant
- › Rubber handle and trigger
- › Increased compressive strength of the thrust mechanism with smooth driving rod and ladder hook
- › For medium to high-viscose acrylates, hybrids, polyurethanes and silicones

H37

H40+

OTTO Hand-operated gun H37

Characteristics

- ▶ Heavy-duty hand-operated gun made from highly impact-resistant plastic
- ▶ Low weight
- ▶ With closer for sliding sleeve and smooth driving rod for 290/300/310 ml cartridges
- ▶ For medium to high-viscose acrylates, hybrids, polyurethanes and silicones
- ▶ Transmission ratio approx. 18:1

OTTO Hand-operated gun H40+

Characteristics

- ▶ Hand-operated gun for rigorous continuous use
- ▶ Half-shell, professional quality device
- ▶ For 280/290/300/310 ml cartridges
- ▶ With hardened, smooth driving rod
- ▶ For medium to high-viscose acrylates, hybrids, polyurethanes and silicones

KWM 10

KWM 18K**OTTO Static mixing nozzle
KWM 18K**

for twin cartridges

**Characteristics**

- ▶ Static mixing nozzles for the processing of our OTTOCOLL® P 520, its SP versions, OTTOCOLL® P 525 and OTTOCOLL® M 580
- ▶ System 1:1, cup connection with internal thread
- ▶ 18 mixing elements
- ▶ Conical tip, inner Ø = 3 mm
- ▶ Length: 217 mm

MGQ 10-19D**OTTO Static mixing nozzle
MGQ 10-19D**

for twin cartridges

**Characteristics**

- ▶ Static mixing nozzles for the processing of our OTTOCOLL® M 580
- ▶ System 1:1, cup connection with internal thread
- ▶ 19 mixing elements, green with wall, with straight tip, inner Ø = 5 mm
- ▶ Length: 157 mm

RWM 14G**MISCHER-TURBO****OTTO Static mixing nozzle
RWM 14G**

for twin cartridges

**Characteristics**

- › Static mixing nozzles for the processing of our OTTOCOLL® P 520 and its SP versions
- › System 1:1, cup connection with internal thread
- › 14 mixing elements, black
- › Inner Ø = 6,8mm
- › Length: 214 mm, with scale for shortening every 10mm

**OTTO Static mixing nozzles
2-component PU**

for twin cartridges

**Characteristics**

- › Static mixing nozzles for the processing of our OTTOPUR Turbo
- › System 1:1
- › 24 mixing elements, transparent
- › Inner Ø = 5mm
- › Length: 230mm

OTTO Cleaning wipes

Special cleaning wipes made of lint-free material

Characteristics

- ▶ Very robust, lint-free wipe
- ▶ Strong cleaning effect
- ▶ Kind to the skin
- ▶ Pleasantly fresh smell
- ▶ Resealable dispenser bucket
- ▶ Dimensions of the wipes: 25x25 cm
- ▶ Contents per bucket: 72 wipes

Fields of application

- ▶ For removing unhardened PU-foam, adhesive and sealant residues from all surfaces

Order unit (OU)	Units per packaging unit	Pieces per pallet	Order code

STÄNDER

OTTO Cartridge stand

Characteristics

- ▶ Can hold 8x13 = 104 cartridges
- ▶ Dimensions 48x62x42 cm (BxHxT)
- ▶ Offers two areas to place advertising stickers
- ▶ Suited also for cartridges with clipped nozzles

Fields of application

- ▶ Presentation of OTTO cartridges in sales areas, on counters and on shelves

OTTOSEAL® M360
 OTTOSEAL® M361
 OTTO Spray primer

p. 29

p. 30

p. 147

Fabric reinforced tape with alternate self-bonding to the frame
 For indoor and outdoor application

Characteristics

- › Good flexibility
- › Variable humidity fabric
- › Can be covered with plaster
- › Alkali-resistant

Fields of application

- › Structural connection according to the window and door mounting regulations
- › For sealing of joints around windows and doors indoors and in exterior areas
- › Levelling of irregularities by bonding with OTTOSEAL® M 360
- › Suitable for use with OTTOPUR PU foams

OTTO Window tape Vario Duo

The full-surface, self-adhesive window tape for RAL assembly

Standards and tests

› Complies with the guidelines of RAL assembly

Fields of application

- › Structural connection according to the window and door mounting regulations
- › For sealing of joints around windows and doors indoors and in exterior areas
- › Suitable for use with OTTOPUR PU foams

BKA MF1

OTTOTAPE Trio-BKA MF1

The multifunctional sealing tape for RAL assembly

Polyurethane foam with impregnation
For indoor and outdoor application

Characteristics

- ▶ Polyurethane foam, saturated with modified acrylic resin impregnation
- ▶ Impregnated multifunctional sealing tape self-adhesive on one side for fast mounting
- ▶ Stretches inside the joint to its final thickness
- ▶ Driving rain resistant, thermal insulating and airtight product
- ▶ Tighter inside than outside, according to the current state of technology
- ▶ Can be covered with plaster and painted
- ▶ Complies with building material class B1 "hardly inflammable" in accordance with DIN 4102-1
- ▶ Resistant to UV light and moisture exposure

Fields of application

- ▶ Structural connection according to the window and door mounting regulations
- ▶ For sealing of joints around windows and doors indoors and in exterior areas
- ▶ For sealing in the parapet area, we recommend the narrower OTTOTAPE Trio FBA or OTTO window tapes.

Standards and tests

- ▶ Complies with the guidelines of RAL assembly
- ▶ Multifunctional sealing tape according to DIN 18542 – MF1
- ▶ Suitable for applications according to IVD instruction sheet no. 24+26+35 (IVD = German industry association sealants)
- ▶ EMICODE® EC 1 PLUS – very low emission

OTTOTAPE Trio-FBA

The multifunctional sealing tape for RAL assembly

Polyurethane foam with impregnation
For indoor and outdoor application

Characteristics

- ▶ Polyurethane foam, saturated with modified acrylic resin impregnation
- ▶ Impregnated multifunctional sealing tape self-adhesive on one side for fast mounting
- ▶ Stretches inside the joint to its final thickness
- ▶ Driving rain resistant, thermal insulating and airtight product
- ▶ Tighter inside than outside, according to the current state of technology
- ▶ Can be covered with plaster and painted
- ▶ Complies with building material class B1 "hardly inflammable" in accordance with DIN 4102-1
- ▶ Resistant to UV light and moisture exposure

Fields of application

- ▶ Structural connection according to the window and door mounting regulations
- ▶ For the sealing of joints of windows in the parapet field
- ▶ For the sealing of the upper and side joints we recommend OTTOTAPE Trio-BKA MF1

Standards and tests

▶ Suitable for applications according to IVD instruction sheet no. 24+26+35 (IVD = German industry association sealants)

D-25-I**OTTOTAPE D-25-I****Duct SPECIAL**

The adhesive foil tape for connecting at breakthroughs

**Characteristics**

- ▶ Single-sided adhesive foil tape
- ▶ With laid scrim, tape stretchable in cross direction
- ▶ Thick adhesive layer (220 g/m²)
- ▶ Processing temperature up to -10 °C
- ▶ Very strong adhesive force on all rough substrates
- ▶ Ageing resistant
- ▶ Very low vapour sensitivity

Fields of application

- ▶ Sealing of ducts on chimneys, ventilation pipes, beams etc.
- ▶ For a permanently airtight sealing in compliance with DIN 4108-7
- ▶ Overlapping bonding of vapour retarders, vapour barriers and insulating materials according to DIN 4108-7
- ▶ Joint bonding on wood panels
- ▶ Not suitable for sauna and swimming pools

 **OTTO product tip**

E-40-I**OTTOTAPE E-40-I****Overlapping SPECIAL**

The adhesive tape for foil overlaps

**Characteristics**

- ▶ Single-sided, solvent-free adhesive tape
- ▶ Kraft paper tape, can be torn by hand
- ▶ Thick adhesive layer (220 g/m²)
- ▶ Processing temperature up to -10 °C
- ▶ Very strong adhesive force on all rough substrates
- ▶ Ageing resistant
- ▶ Almost completely resistant to moisture

Fields of application

- ▶ For a permanently airtight sealing in compliance with DIN 4108-7
- ▶ Overlapping bonding of vapour retarders, vapour barriers and insulating materials according to DIN 4108-7
- ▶ Joint bonding on wood panels
- ▶ Not suitable for sauna and swimming pools

OTTOTAPE Fixing tape

The double-sided adhesive fixing tape

Characteristics

- ▶ Double sided pure acrylate PE foam strip
- ▶ Excellent weathering, ageing and UV-resistance
- ▶ Extreme plasticizer resistance. The polyethylene foam stays permanently flexible
- ▶ Very good adhesion on flat surfaces
- ▶ A high level of initial tack provides an adequate level of application safety directly after application
- ▶ Does not damage the mirror coating
- ▶ Vibration dampening and stabilizing with different expansivities of join partners

Fields of application

- ▶ Initial fixing during adhering of wing-concealing door fillings with OTTOCOLL® M 580 or OTTOCOLL® S 81
- ▶ Supporting fixing during adhering of mirrors
- ▶ Installation of PVC sash bars

Dimensions	Order unit (OU)	Packaging unit (PU)	Order code
10 x 1 mm	1 roll, each 25 m	10 rolls, each 25 m	FIXBA

OTTO Jointing tape BG 1

The precompressed jointing tape BG 1

Polyurethane foam with impregnation
For indoor and outdoor application

Characteristics

- ▶ Impregnated foam tape, self-adhesive on one side
- ▶ Stretches slowly inside the joint to its final thickness
- ▶ Forms a driving rain resistant joint according to DIN 18542
- ▶ Good UV-resistance
- ▶ Flame resistant
- ▶ Protects against moisture and dust, heat loss, noise etc.
- ▶ Compatible with concrete, cellular concrete, bricks, sandlime brick, iron, zinc, steel, galvanised sheet metal, aluminium, copper, wood and unplasticized PVC

Fields of application

- ▶ Sealing of joints
- ▶ Joint between masonry and door or window frames
- ▶ Joint between masonry and concrete pillars, gable and roofing panels, sheet metal window sills, expanding joints, sheet pile profiles and corrugated panels

Standards and tests

- ▶ BG 1 according to DIN 18542
- ▶ Driving rain resistant up to 600 Pa according to DIN EN ISO 1027
- ▶ Compatible with general construction material according to DIN 18542
- ▶ General building inspection certificate: Tested and monitored (MPA BUA Hannover, Germany) – flame-resistant building material (building material class B1) according to DIN 4102-1
- ▶ Suitable for applications according to IVD instruction sheet no. 11+24+26+31+32+35 (IVD = German industry association sealants)
- ▶ French VOC-emission class A+
- ▶ EMICODE® EC 1 PLUS – very low emission

OTTO Insulating tape BG 2

The precompressed insulating tape BG 2

Polyurethane foam with impregnation
For indoor and outdoor application

Characteristics

- ▶ Impregnated foam tape, self-adhesive on one side
- ▶ Stretches slowly inside the joint to its final thickness
- ▶ Forms a driving rain resistant joint according to DIN 18542
- ▶ Good UV-resistance
- ▶ Protects against moisture and dust, heat loss, noise etc.
- ▶ Compatible with concrete, cellular concrete, bricks, sandlime brick, iron, zinc, steel, galvanised sheet metal, aluminium, copper, wood and unplasticized PVC

Fields of application

- ▶ Sealing of joints against sound, driving rain, dust, draft and heat loss
- ▶ Especially suitable for joint constructions as in e.g. coupled windows, hidden window joints to define a boundary for sealants

Standards and tests

- ▶ BG 2 according to DIN 18542
- ▶ Driving rain resistant up to 600 Pa according to DIN EN ISO 1027
- ▶ Compatible with general construction material according to DIN 18542
- ▶ General building inspection certificate – normal inflammable building material (B2) according to DIN 4102-1
- ▶ Suitable for applications according to IVD instruction sheet no. 24+26+31+32+35 (IVD = German industry association sealants)
- ▶ French VOC-emission class A+
- ▶ EMICODE® EC 1 PLUS – very low emission

OTTO Flexi tape

The glazing tape for insulating glass

PE flexible foam tape
For indoor and outdoor application

Characteristics

- ▶ Reinforced for tensile strength
- ▶ Closed-cell
- ▶ Ageing resistant
- ▶ Compatible with OTTO silicone sealants
- ▶ Available with or without removable strip

Fields of application

- ▶ Used as a glazing tape for insulating glass in accordance with the Rosenheim specifications

Standards and tests

- ▶ French VOC-emission class A+

OTTO Flexi tape SP with peel-off foil

PE

OTTOCORD PE-B2

The closed-cell PE back-up foam rod

**Characteristics**

- › Extruded backfilling material made of polyethylene (PE)
- › For application in interior and exterior areas
- › Closed-cell according to DIN 18540
- › Water-repellent
- › Normally flammable

Fields of application

- › Backfilling of joints in interior and exterior areas
- › For building construction joints according to DIN 18540

Standards and tests

- › Tested fire behaviour: normal inflammable building material (class E according to DIN EN 13501-1)

PUR-H**PUR-HS****OTTOCORD PUR-H-B3**

The open-cell PUR back-up foam rod soft

**Characteristics**

- › Backfilling material made of polyurethane
- › For interior use without wet load
- › According to the building material class B3

Fields of application

- › Backfilling of joints in interior areas

OTTOCORD PUR-HS-B3

The open-cell PUR back-up foam rod firm

**Characteristics**

- › Backfilling material made of polyurethane
- › For interior use without wet load
- › Firm and rigid quality
- › According to the building material class B3

Fields of application

- › Backfilling of joints in interior areas

**Additional useful information**

When wet, we recommend the closed-cell OTTOCORD PE-B2 on page 196.

Mounting of well shaft rings		OP910 OP915 OP920 OP930
Sealing applications in the food and drinking water sector (e. g. in dairies, abattoirs)	M390 S27 S34 S70 S80 S110 S125 S130	
Sealing work in clean-rooms (e. g. operating theatres, microelectronics etc.)	M380 S51 S67 S69	
Swimming pool and underwater seals	S18 S70 S140	
Window frames and window bars – sealing	S112	

OTTOSEAL® sealants

	Bathroom and swimming pool sealants	10
	Natural stone sealants	17
	Expansion and connection joint sealants	23
	Floor sealants	36
	Fire protection and high temperature sealants	44
	Special sealants	49
	Glass, window and façade sealants	54

OTTOCOLL® adhesives

	Hybrid adhesives	70
	PU adhesives	79
	Acrylic adhesives	85
	Silicone adhesives	88
	Glass, window and façade adhesives	92

Other products

	OTTOFLEX® system compound sealing	98
	OTTOPUR PU foams	120
	Smoothing agents	128
	Accessory products	133
	Primers/Cleaners	138
	Guns	149
	Processing tools/Accessories	164
	Tapes/Back-up foam rods	185

Application list with product recommendation

Sealing

A			
Acid resistant – sealing	S34		
Acrylic (bath-) tubs – sealing	S70 - S80 - S100 - S105 - S110 - S115 - S125 - S130 - S140		
Acrylic glass – sealing	S72		
Air-conditioning systems – sealing	M350 - M380 - M500 - M580 - P83 - S67 - S69		
Aluminium – sealing	M350 - M360 - M361 - P300 - P305 - S110 - S115 - S120 - S125		
Angled/roof windows	S7 - S10 - S610		
Anodized aluminium – sealing	M360 - M361 - S110 - S115 - S120 - S125		
Aquaria – sealing	S28		
Artificial concrete stone – sealing	S70 - S80		
Artificial stone – sealing	S70 - S80 - S117 - S130 - S140		
B			
Bath tubs – sealing	S70 - S80 - S100 - S105 - S110 - S115 - S125 - S130 - S140		
Bathroom joints – elastic sealing	S70 - S80 - S100 - S105 - S110 - S115 - S125 - S130 - S140		
Bitumen rails – sealing	A250		
Boiler – sealing	S17 - S25		
Brass – sealing	P300 - P305 - M350 - M360 - M361 - S110 - S115 - S120 - S125		
Building construction joints – sealing	M360 - M361 - P300 - P305		
C			
Car body joints – sealing	M500 - M501 - M550 - M580 - P83		
Cast member parts of boilers – sealing	S17 - S25		
Ceramique floors – sealing	S100 - S105 - S110 - S115 - S120 - S125 - S130 - S140		
Chemical resistant sealant	S34		
Chimney parts – sealing	S17 - S25		
Chrome – sealing	M350 - M360 - M361 - M500 - P300 - P305 - S110 - S115 - S120 - S125		
Clean rooms – sealing	M380 - S51 - S67 - S69		
Climatisation systems – sealing	S72		
Closure of cracks and holes in façades and interior walls, such as in scaffolding	M360 - M361		
Compatible with paints according to DIN 52452 – Sealants	A205 - A210 - A215 - A225 - A270 - M350 - M360 - M361 - M500 - P83 - P300 - P305 - P720		
Concrete joints – sealing	M360 - M361 - P300 - P305 - S110 - S115 - S120		
Connection joints – sealing	A205 - A210 - A710 - M350 - M360 - M361 - P300 - P305 - P720 - S100 - S110 - S115 - S120 - S125 - S730 - BAB-V - BAB-VD - OFB		
Copper sheets – sealing	M350 - M360 - M361 - P300 - P305 - S110 - S115 - S120 - S125		
Cotto slabs – sealing	S70 - S80 - S100 - S130		
D			
Dairies – sealing	S27 - S130		
Door rabbets – sealing	S70 - S80 - S110		
Drinking water tanks – sealing	S27		
Driving rain – resistant sealing	P720 - S730 - OFB		
E			
Enamelled glass – sealing	S70 - S80		
F			
Facades – sealing	M360 - M361 - P300 - P305 - S7 - S10 - S70 - S80 - S110 - S120		
Filling cracks in plaster	A215		
Fire-proof sealants according to DIN 4102-B1	S51 - S54 - S94		
Flame resistant sealants	S51 - S54 - S94		
Floor joints – sealing	A221 - M390 - S34 - S51 - S70 - S80 - S125 - S140		
Fungicide containing – sealants	M380 - S18 - S67 - S70 - S80 - S100 - S105 - S110 - S115 - S117 - S120 - S125 - S130 - S140 - S730		
G			
Glass bricks – sealing	S28 - S100		
Glass facades – sealing	S7 - S10		
Glass ornaments – sealing	S50 - S610		
Grainy putty	A215		
Granite – sealing	S70 - S80 - S117 - S130 - S140		
Green house – sealing	S10		
Green house – sealing	S7 - S10		
Gypsum fibreboard – sealing	A205 - M500		
H			
Heating pipes – temperature resistant sealing	S17 - S25		
I			
Industrial floors – sealing of	M390 - S34		
Insulated glass – edge bonding	S9		
Insulating glass – window pane sealing	S9		
J			
Jointing cork floors/plates	A221 - M390		
Jointing laminate flooring	A221 - M390		
Jointing parquet floors	A221 - M390		

Jointing wood	A221 - M350 - M390 - S 110 - S 120
Jointing wooden board flooring	A221 - M390
Jointing wooden floor boards	A221 - M390
K	
Kitchen worktops – sealing	S27 - S70 - S80 - S 110 - S120
L	
Lacquered glass – sealing	S70 - S80
Linoleum – sealing	M390 - S51 - S 125
M	
Marble facades – sealing	S70 - S80 - S117
Marble joints – sealing	S70 - S80 - S117 - S130 - S140
Melted asphalt floor screed – sealing	S54 + PR1226
Metal joints – sealing	M350 - M360 - M361 - P300 - P305 - S110 - S115 - S120 - S125
Mirrors – sealing	S70 - S80 - S120 - S125
Moisture-prone rooms – full surface sealing	OFS
N	
Natural stone facades – sealing	S70 - S80 - S117
Natural stone joints – sealing	S70 - S80 - S117 - S130 - S140
Non staining sealants	S70 - S80 - S117 - S130 - S140
Non-ferrous metals – sealing	M350 - M360 - M361 - P300 - P305 - S110 - S115 - S120 - S125
O	
Operating theatres – sealing	S67 - S69
P	
Permanent wet condition – sealing	S18 - S70 - S140
Polyacrylate (acrylic glass) – sealing	S72
Polycarbonate sheets – sealing	S72
Polyester – sealing	S110 - S120 - S125 - S100 - S105
Prefabricated concrete – sealing	M360 - M361 - P300 - P305
Profile batches – sealing	A225
Profilit TM window pane sealing	M350 - S100 - S105 - S110 - S120
PVC floors – sealing	M390 - S51 - S125
R	
Rabbets of wooden windows	M350 - S110 - S120
Ray protective glass – sealing	S10
Refrigeration rooms – sealing	S27 - S130
Roof glazings	S7 - S10 - S610
Roof gutter – sealing	A250 - S110
Roofing felt – sealing	A250
Roofs – sealing	A250
Rubber knob floors – sealing	M390 - S51 - S125

S	
Sandstone – jointing	S70 - S80 - S117 - S130 - S140
Sanitary joints – sealing	S80 - S100 - S105 - S110 - S115 - S125 - S130 - S140
Seal patio slabs (ceramics + natural stone)	S70 - S80
Seal public sanitary facilities	S140
Sealing design floor coverings made of linoleum	M390 - S51 - S125
Sealing design floor coverings made of PVC	M390 - S51 - S125
Sealing design floor coverings made of rubber	M390 - S51 - S125
Sealing design floor coverings made of vinyl	M390 - S51 - S125
Sealing of clinker	M360 - S110 - S115 - S120 - S125
Sealing shop windows	S50
Sealing vinyl floor coverings	M390 - S51 - S125
Sheet metal – sealing	P300 - P305 - M350 - M360 - M361 - S110 - S115 - S120 - S125
Shower – sealing	S70 - S80 - S100 - S105 - S110 - S115 - S125 - S130 - S140
Slaughterhouses – sealing	S27 - S130
Stainless steel (Nirosta) – sealing	M350 - M360 - M361 - P300 - P305 - S70 - S80 - S110 - S115 - S120 - S125
Stoves – temperature resistant sealing	S17 - S25
Streak-free sealants according to ift directive VE-04/2	S110 - S120
Stream-jet cleaning – resistant sealing	M390 - S34
Structural connection according to the window and door mounting regulations	A710 - P720 - S730 - BAB-V - BAB-VD - BKAMF1 - FBA
Structural glazing units – sealing	S7 - S10
Swimming pools – sealing	S18 - S70 - S140
Synthetic flooring – sealing	M390 - S51 - S125
Synthetic materials – sealing	S72
T	
Temperature resistant sealing	S17 - S25
Terracotta slabs – sealing	S70 - S80 - S100 - S110 - S120 - S125 - S130
Tighter inside than outside	A710 - P720 - S730 - BAB-V - BAB-VD - BKAMF1 - FBA
Tile stove – jointing	A215
Tiles – sealing	S100 - S105 - S110 - S115 - S120 - S125 - S130 - S140
Tiles – sealing	S100 - S105 - S110 - S115 - S120 - S125 - S130 - S140
Timber-glass-composite elements – sealing	S7 - S10
Tinplate – sealing	M360 - M361 - S110 - S115 - S120 - S125
Twin-wall sheets – sealing	S72

OTTO CHEMIE
DICHTEN & KLEBE

Quantity charts

General valid joint dimension:

The rule of thumb for calculating the joint dimension is as follows:

Sealant depth (t) = 0.5 x joint width (b).

The thickness of the sealant (d) equals 2/3 of the joint width(b).

These minimum joint widths are also valid for joints in the interior with sealants ≥15 % movement capability.

The ratio between the width of the sealant in the joint (b) and the depth of the sealant in the joint (t) has to be as follows:

Joint width b in a ratio of joint depth t

b in mm	10-15	15-20	20-25	25-30	30-35
t in mm	8±2	10±2	12±2	15±3	15±3

Source: Industrieverband Dichtstoffe e. V./HS PR.

Additional information to the IVD's instruction leaflets under www.ivd-ev.de.

Quantity charts

These values are approximate and serve as a rough guide for rightangled joints. The depth of the joints is measured to the rear of the profile. Depending on the processing technology, an additional requirement of 25 % should be expected.

Terms and Conditions of Business of Hermann Otto GmbH

I. General provisions

1. All offers, supplies and agreements are based exclusively on our Terms and Conditions of Business.
2. Unless otherwise agreed, the terms and conditions in the version valid at the time of the buyer's order shall also apply to similar future contracts.
3. We explicitly contradict the Terms and Conditions of Business and Purchase of the purchaser. We are not committed to them, even if we did not contradict them at the time the contract was concluded.
4. Our offers are subject to change. Contracts and agreements are not binding until they have been confirmed by us in writing, especially if they change the present Terms and Conditions. Agreements entered by our field service employees are only effective if they have been confirmed by us in writing.
5. The purchaser is not permitted to set off counterclaims unless the counterclaims are undisputed or have been legally finalised. The purchaser is not entitled to a right of retention. This does not apply to business transactions with consumers, insofar as the right of retention is based on the same contractual relationship. A right to refuse performance on the part of the purchaser is excluded for business transactions with companies.
6. When contract manufacturing is carried out, if our customer has stipulated the recipes and/or equipment, it must assume liability for not infringing any third party industrial property rights owing to the production and/or equipment. If necessary, it must release us from potential third party claims on our first request.

II. Dispatch

1. Unless otherwise agreed, dispatch takes place at the expense and risk of the purchaser. When the goods are transferred to the forwarder or carrier or at the latest when the goods have left the factory or warehouse, the risk transfers to the purchaser. If the goods are damaged during transportation or the goods listed in the bill of lading are not delivered in full, the recipient of the goods must have the deliverer (in the case of dispatch by a carrier – the lorry driver; if sent by rail (Deutsche Bahn) – the receiving goods station) note it immediately in detail on the bill of lading and confirm same by signing it. The bill of lading with the note on damage must be handed over to us to enable us to assert claims for compensation on behalf of the purchaser; we are not committed to bring legal action to assert the claims, however we do commit ourselves to seizing such measures that enable the purchaser to assert claims by way of legal action. Even if free delivery to the receiving station of the purchaser has been agreed, the purchaser bears the transportation risk. If transport damage does occur, we give compensation to the same extent as we ourselves receive compensation for the transport damage. Compensation is given at our discretion either in the form of a free replacement delivery or a credit note for the amount to be reimbursed.
2. When dispatching the goods we are entitled to choose the means of conveyance and the shipping route without assuming any liability. This disclaimer does not apply if the Managing Director or Managing Directors or one of our executives has/have at least acted with gross negligence in the course of business transactions with companies or if the senior management or any one of our employees have acted with gross negligence in business transactions with consumers. We are only obliged to provide transport insurance if it is explicitly demanded. The purchaser must bear the costs.

III. Delivery period

1. Delivery periods are non-binding, even if they are included in our dispatch notifications or date confirmations. A separate written agreement is required for a claim to compliance with the delivery period.
2. Irrespective of our rights, if the purchaser is in arrears, the agreed term is extended by the period by which the purchaser is in arrears with its obligations under the present or past contracts. This applies analogously if a delivery date has been agreed.
3. If we fall behind, the purchaser must set an appropriate period of grace. When said period of grace expires the purchaser may cancel the contract if the goods have not been reported to be ready for dispatch by that time.
4. Any claims for compensation for a failure to meet delivery periods or dates are limited to the value of the contract unless the delay has been caused by the Managing Director(s) or one of our employees owing to negligence.
5. Cases of force majeure entitle us to delay delivery for as long as it is obstructed, plus a reasonable time for recommencing, or to cancel the contract owing to the part of the contract which has not been fulfilled. Strikes, lockout, riots and other circumstances which make delivery difficult or impossible are equivalent to force majeure, irrespective of whether they occur to us or one of our sub-suppliers. The purchaser can demand a statement from us as to whether we want to cancel or deliver within a reasonable period. If we fail to make a statement, the purchaser is entitled to cancel the contract. Deliveries to the buyer are subject to national or international regulations of foreign trade law, embargos or other legal prohibitions.

IV. Terms of Payment

1. Our invoices are due for payment within 30 days of the invoice date without any discount.
2. If the target date is not met, we charge interest on arrears at a rate equivalent to the respective interest rate for short-term bank loans, but in the amount of 5 percent points p.a. above the respective base interest rate in the case of legal transactions in which no consumer is involved, at 8 percent points p.a. above the relevant base interest rate.
3. If, after conclusion of the contract, significant negative circumstances arise for us with regard to the credit-worthiness of the buyer, we shall be entitled to demand reasonable security for his delivery. If the buyer does not comply with this request, we are entitled to withdraw from the contract. This right also applies for the buyer in the case of imminent danger without having previously sought the provision of adequate securities.
4. Payments shall only be deemed to have been affected when the amount is finally available on our account.

V. Retention of title to ownership

1. We reserve the right of ownership of the delivered goods (reserved goods) for both entrepreneurs and consumers until the respective purchase price claim has been settled.
2. The purchaser is entitled to process and sell the goods subject to retention of title to ownership by way of normal business transactions insofar as it is not in arrears with its payment. It is only entitled to resell or process the goods subject to retention of title to ownership providing that the accounts receivable from reselling or processing are transferred to us as stipulated in numbers 3 – 5. It is not authorised to dispose of the goods subject to retention of title to ownership in any other way.
3. The purchaser herewith assigns its accounts receivable from reselling and/or processing the goods subject to retention of title to us, irrespective of whether the goods subject to retention of title to ownership are sold to one or more purchasers or have been processed for one or more customers.
4. The purchaser is authorised to collect the accounts receivable from resale or processing assigned to us unless we revoke this authorisation, which we may do at any time. Insofar as our accounts receivable are due, the purchaser is under obligation to immediately pay the collected amounts to us. On no account is the purchaser authorised to assign the accounts receivable to any third party.
5. Unless we inform its customer ourselves, if we so request, the purchaser is under obligation to inform the customer immediately of the assignment of its accounts receivable to us and provide us with proof of such notification and send us the information and documents required for collecting the assigned accounts receivable together with this notification.
6. The purchaser is under obligation to inform us of garnishment or any other adverse action by a third party.
7. The authorisation of the purchaser to collect will be revoked if the terms of payment are not met or if the purchaser infringes contractual agreements, if the purchaser ceases to pay and if settlement or bankruptcy proceedings are opened.

VI. Instructions for use

1. In view of the fact that our products are used under very varied working conditions and for different applications, our instructions for use can only constitute general guidelines. If special requirements are made, which are beyond the scope of the applications and working conditions mentioned in the instructions for use, we are prepared to give more extensive advice for the purpose of support; however this does not constitute any kind of legal commitment on our part. Irrespective of this, owing to the many types of applications for our products and the varying conditions under which they are used, it is always necessary for the user to previously check all the product properties considered important for the respective purpose, and to verify them in practice. The information in the relevant up-to-date technical data sheet must be taken into account for this purpose.
2. Information on the amount to use given in our instructions for use represents average values taken from practical experience.

VII. Notification of defects, liability

1. All statements about suitability, processing and application of our products, technical advice and other information are given to the best of our knowledge; however, they do not release the purchaser from the obligation to carry out its own tests and experiments. If specific qualities or the assumption of any warranties have been agreed, they are only binding for us if they have been made explicitly in writing in the contract. The current technical datasheet – as can be accessed from our homepage on the Internet – is relevant for any claims for defects with regard to the quality and application of the product. It can also be made available in other ways at any time, if requested. If the seller deviates from instructions given there, we exclude any claim for defect or any other form of liability.
2. Commercial buyers must inspect the delivered goods immediately for any defects and, if a defect becomes apparent, notify us immediately in writing stating the batch number, the invoice number and the invoice date. If we do not receive notification, the goods are considered accepted. For purchasers who are not consumers this applies both to visible and invisible defects. If the purchaser is a consumer, he or she must lodge a complaint about obvious, visible defects within 14 days.
3. In the event that the goods that we deliver show any defects and the purchaser reports the defect in time within the deadlines stated in number 3, we will provide free replacement insofar as the defect existed at transfer of risk. If post-performance fails the purchaser has the right to choose between reduction of the payment and cancellation of the contract. Paragraph 5 below applies to any claims for damages or reimbursement of expenses.
4. In case of complaint the purchaser must grant us the opportunity to verify the complaint by sending material samples to us immediately if we so request. If the purchaser infringes this obligation, the purchaser is not entitled to claim for defects unless the infringement of this purchaser obligation neither hinders our verification of the cause of the damage nor makes it more difficult. We will assume the costs for sending us material samples and of sampling itself if the material delivered was defective. This does not prejudice cancellation or return rights which may ensue from consumer protection rights.
5. We assume liability towards the purchaser for compensation – irrespective of the legal reason be it under contract or owing to tort – only in cases of intent, gross negligence, owing to injury of life, the body or health or because an agreed quality is lacking or because of the infringement of important (cardinal) contractual duties or other mandatory statutory regulations. Compensation for the infringement of important contractual duties is restricted to foreseeable damage typical for the contract and, in this case, to a maximum of € 500,000. This applies unless our legal representative or our vicarious agents have acted with intent or gross negligence or if it is a case of injury of life, the body or health. A shift in the burden of proof to the disadvantage of the purchaser is not implied by the above provisions. The provisions above apply analogously to compensation for futile efforts.

VIII. Liability for compensation for damage due to culpability; reimbursement of expenses

1. We shall not be liable for damage caused by unsuitable, inappropriate or not intended use of the goods.
2. Insofar as liability presupposes culpability, our liability for compensation, irrespective of the legal grounds – be it based on a contract or a tort – is restricted in compliance with the following provisions. A shift in the burden of proof to the disadvantage of the purchaser is not implied.
3. We do not assume liability for ordinary negligence, insofar as it does not constitute a breach of important contractual duties. Important contractual duties are, in particular, the obligation to deliver the object of delivery punctually and without any major deficits, and the protection obligations for the benefit of the purchaser, in particular for health and life.
4. Insofar as the grounds make us liable for compensation for damages, this liability is restricted to damage which we predicted to be a potential consequence of a breach of contract at the time the contract was concluded, or which we should have foreseen, had we applied due diligence. Our duty to compensate for material damage and further financial losses resulting from it is limited to a sum of maximally € 500,000 per claim. In the course of business with entrepreneurs liability for damages caused by delay is limited to the value of the order.
5. The above exemptions from and limitations of liability also apply to the compensation for wasted expenditure on the part of the purchaser.
6. The above exemptions from and limitations of liability apply to the same extent to our organs, legal representatives, employees and other vicarious agents.
7. Insofar as we give technical information or advice, and this information or advice is not part of the performance or services we owe under the terms of contract, we do so free of charge and to the exclusion of any liability.
8. The above limitations do not apply to liability for intentional acts, to guaranteed quality features, to injury to life, body or health or under the terms of the Product Liability Act.

IX. Place of performance and legal venue

The place of performance for both parties to the contract is D-83413 Fridolfing if the purchaser is an entrepreneur. For all disputes arising from the business relations – including bill of exchange and cheque issues – in the case of business transactions with traders the legal venue is D-83278 Traunstein.

X. Information in accordance with § 36 of the German Law on Alternative Dispute Resolution for Consumer Disputes

We are neither willing nor obliged to participate in dispute resolution processes in accordance with the Law on Alternative Resolution for Consumer Disputes.

XI. Final clauses

1. German law alone shall apply to the business relationship with our customers; foreign law is excluded under all circumstances. The UN Convention on Contracts for the International Sale of Goods (CISG) is not however applicable.
2. If our customers export our merchandise to territories outside the Federal Republic of Germany, we assume no liability if third-party industrial property rights are infringed. The purchaser is obliged to pay damages caused by us exporting the merchandise if we did not supply it explicitly for export purposes.
